Luxury heated loungers from SOLEUM

We produce very luxurious, timeless heated spa for the demanding customer and the upscale spa area. We define these heating completely new – away from the plump standard to the optically high -quality spa interior. With its look, the infrared lounge becomes a very prominent piece of furniture with the advantages of infrared radiation heat.

whether private spa, private living area or luxury hotel industry

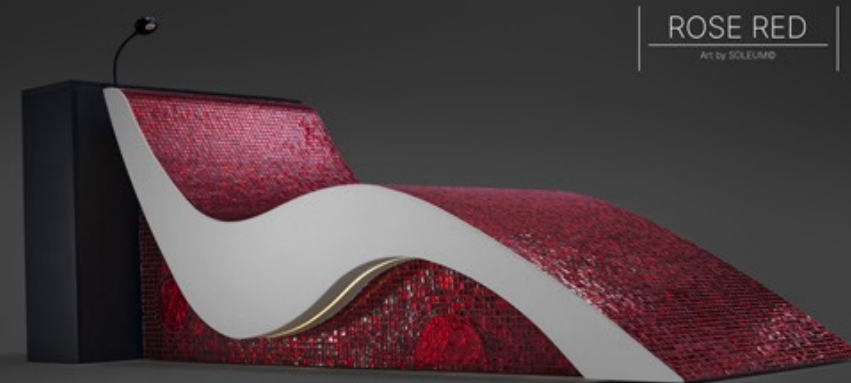

Each of our loungers is made in elaborate manual work in our factory according to their color and material design. Configure our heated wellness loungers to match your SPA project.

LUXURY SPA heated lounge “FLYING CARPET”

The Flying Carpet is a luxurious tiled heated lounge from SOLEUM®. A noble eye-catcher in oriental style. Thanks to the lounge architecture with a gentle curve, the lounge fits into any luxurious wellness and sauna area. However, it is also an exclusive piece of furniture and also finds its place in living rooms, lofts, foyers or even in company buildings for power napping.

The lower side LED lighting in warm white makes the elegant tiles from SICIS® shine even more and highlights them.

The standard design of the side lying areas is made of white concrete (microcement). If requested, we can color this in a color of your choice. The lounge is luxuriously upgraded with a gold real metal coating and overlays - see below.

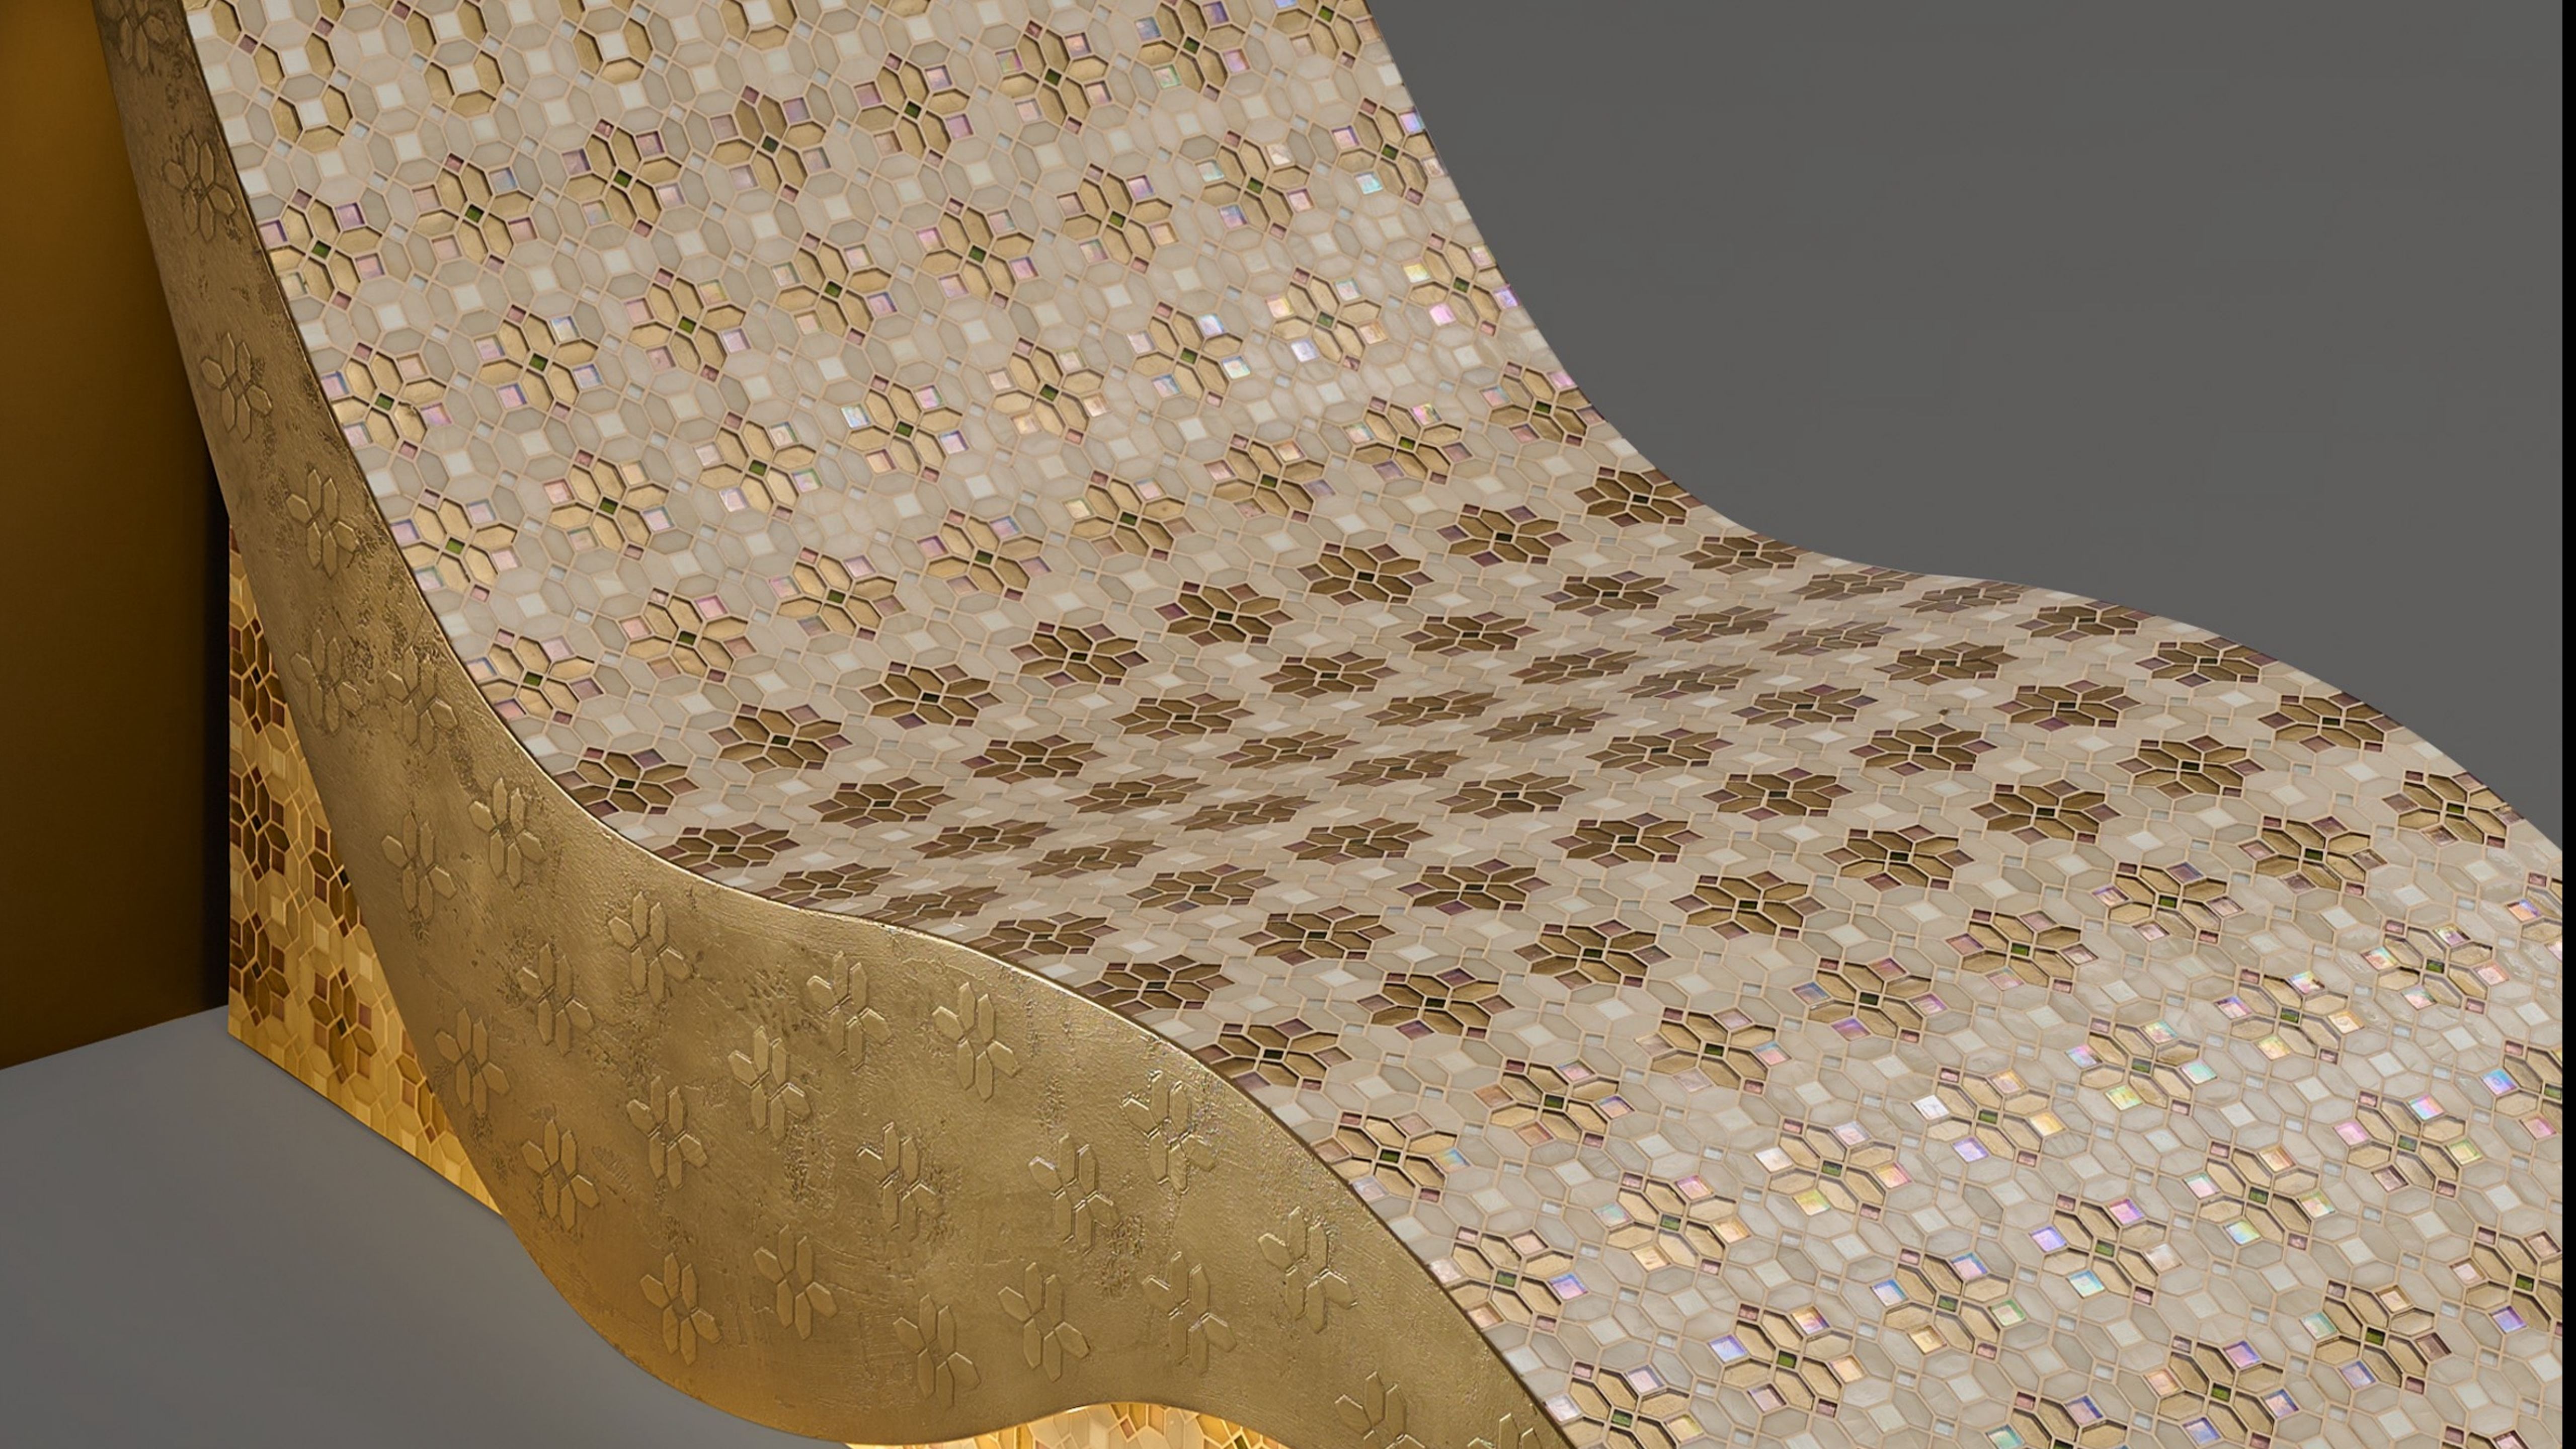

Luxury glass mosaic and gold coating on the sides

OPTION: Handcrafted gold metal plating on both sides

To make the design even more luxurious, we can provide the lounge with a real metal coating on both sides. Handcrafted in 3 layers and with a special technique, a surface is created here that resembles antique works of art. In a fourth layer, the star design of the tiles is applied in gold. The heated loungers become true works of art and exclusive pieces of furniture.

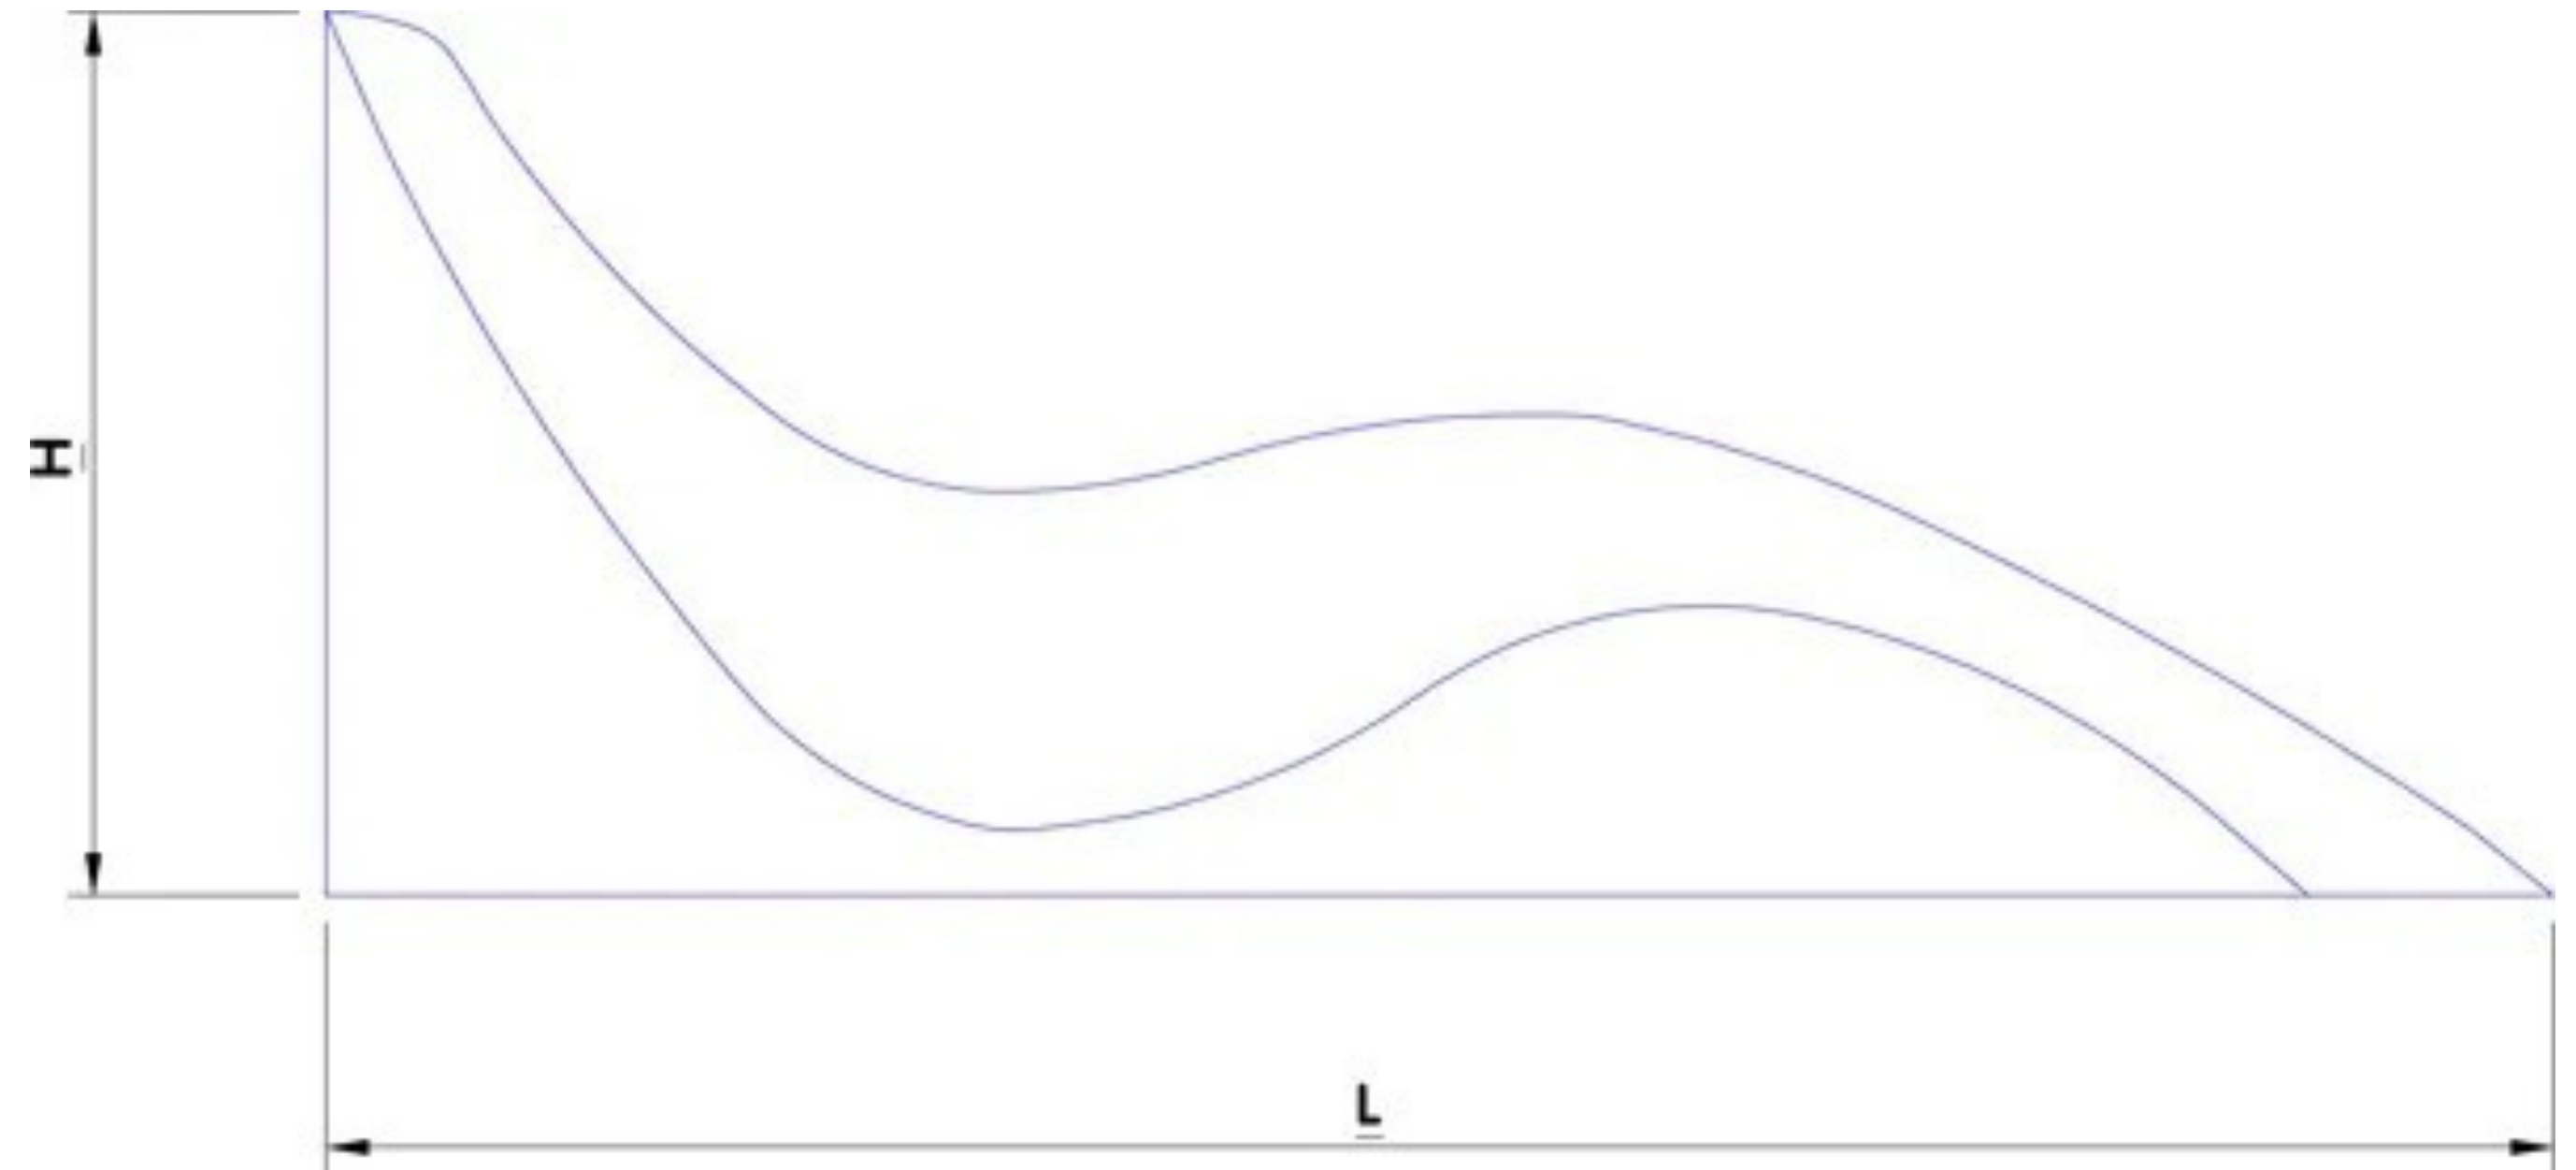

Dimensions valid for the models: FLYING CARPET, ROSE RED, MYTHOS, LOVT, SNOW WHITE

Specifications:

- Luxury mosaic: ORIENT
- Special epoxy grout that is best matched to the surface of the mosaic
- Heater output: 459 W, 230 V (110 V available)
- The temperature is freely adjustable, typically ~30-45°C (usually around 37°C)
- delivered ready to plug in, “Plug & Play”
- With LED lighting under the base (warm white)

Weight: only approx. 80kg

Dimensions: Length 204 cm, Width 76 cm, High 83 cm, Seathigh ~40 cm

Even in the private SPA area

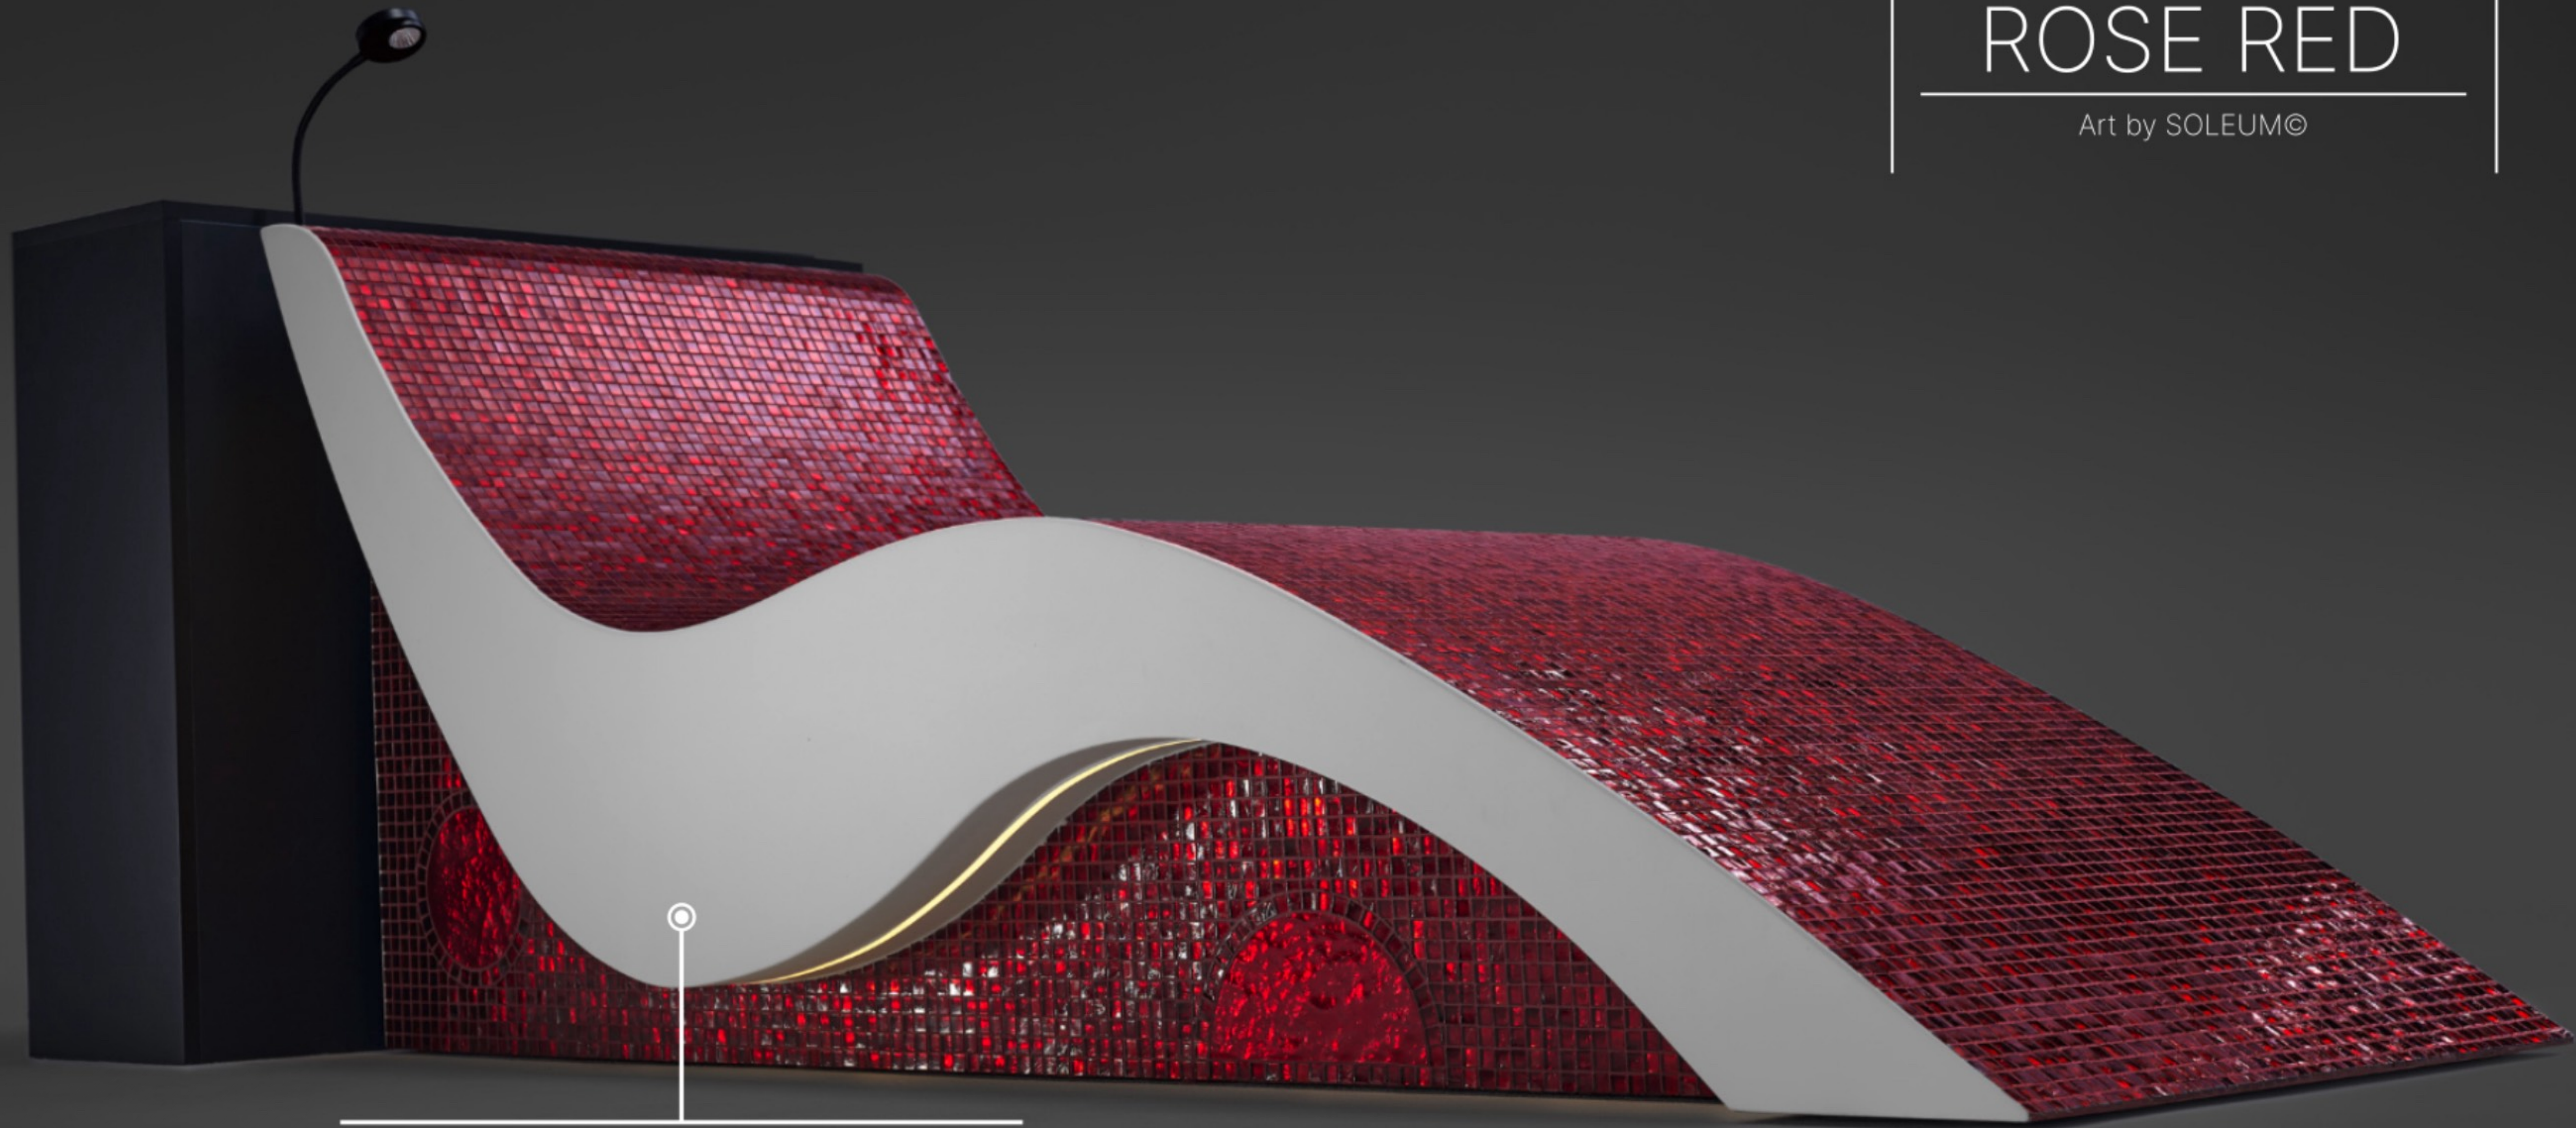

Get the beneficial effects of infrared heat in your home. Your personal “Private SPA” – whether in the living room, winter garden, bedroom or in the wellness bathroom.

Areas of application in the commercial sector

- Hotel suites
- “Luxury” Chalets
- Luxury hotels
- Hotel SPA
- Wellness areas and sauna areas
- Exclusive relaxation rooms
- Luxury bathing landscapes
- Private SPAs

Heated wellness lounge “ROSE-RED”

The color of this heated wellness lounge is so unusual that you HAVE to look! Blood-red glass mosaic that shimmers and shines differently from every angle.

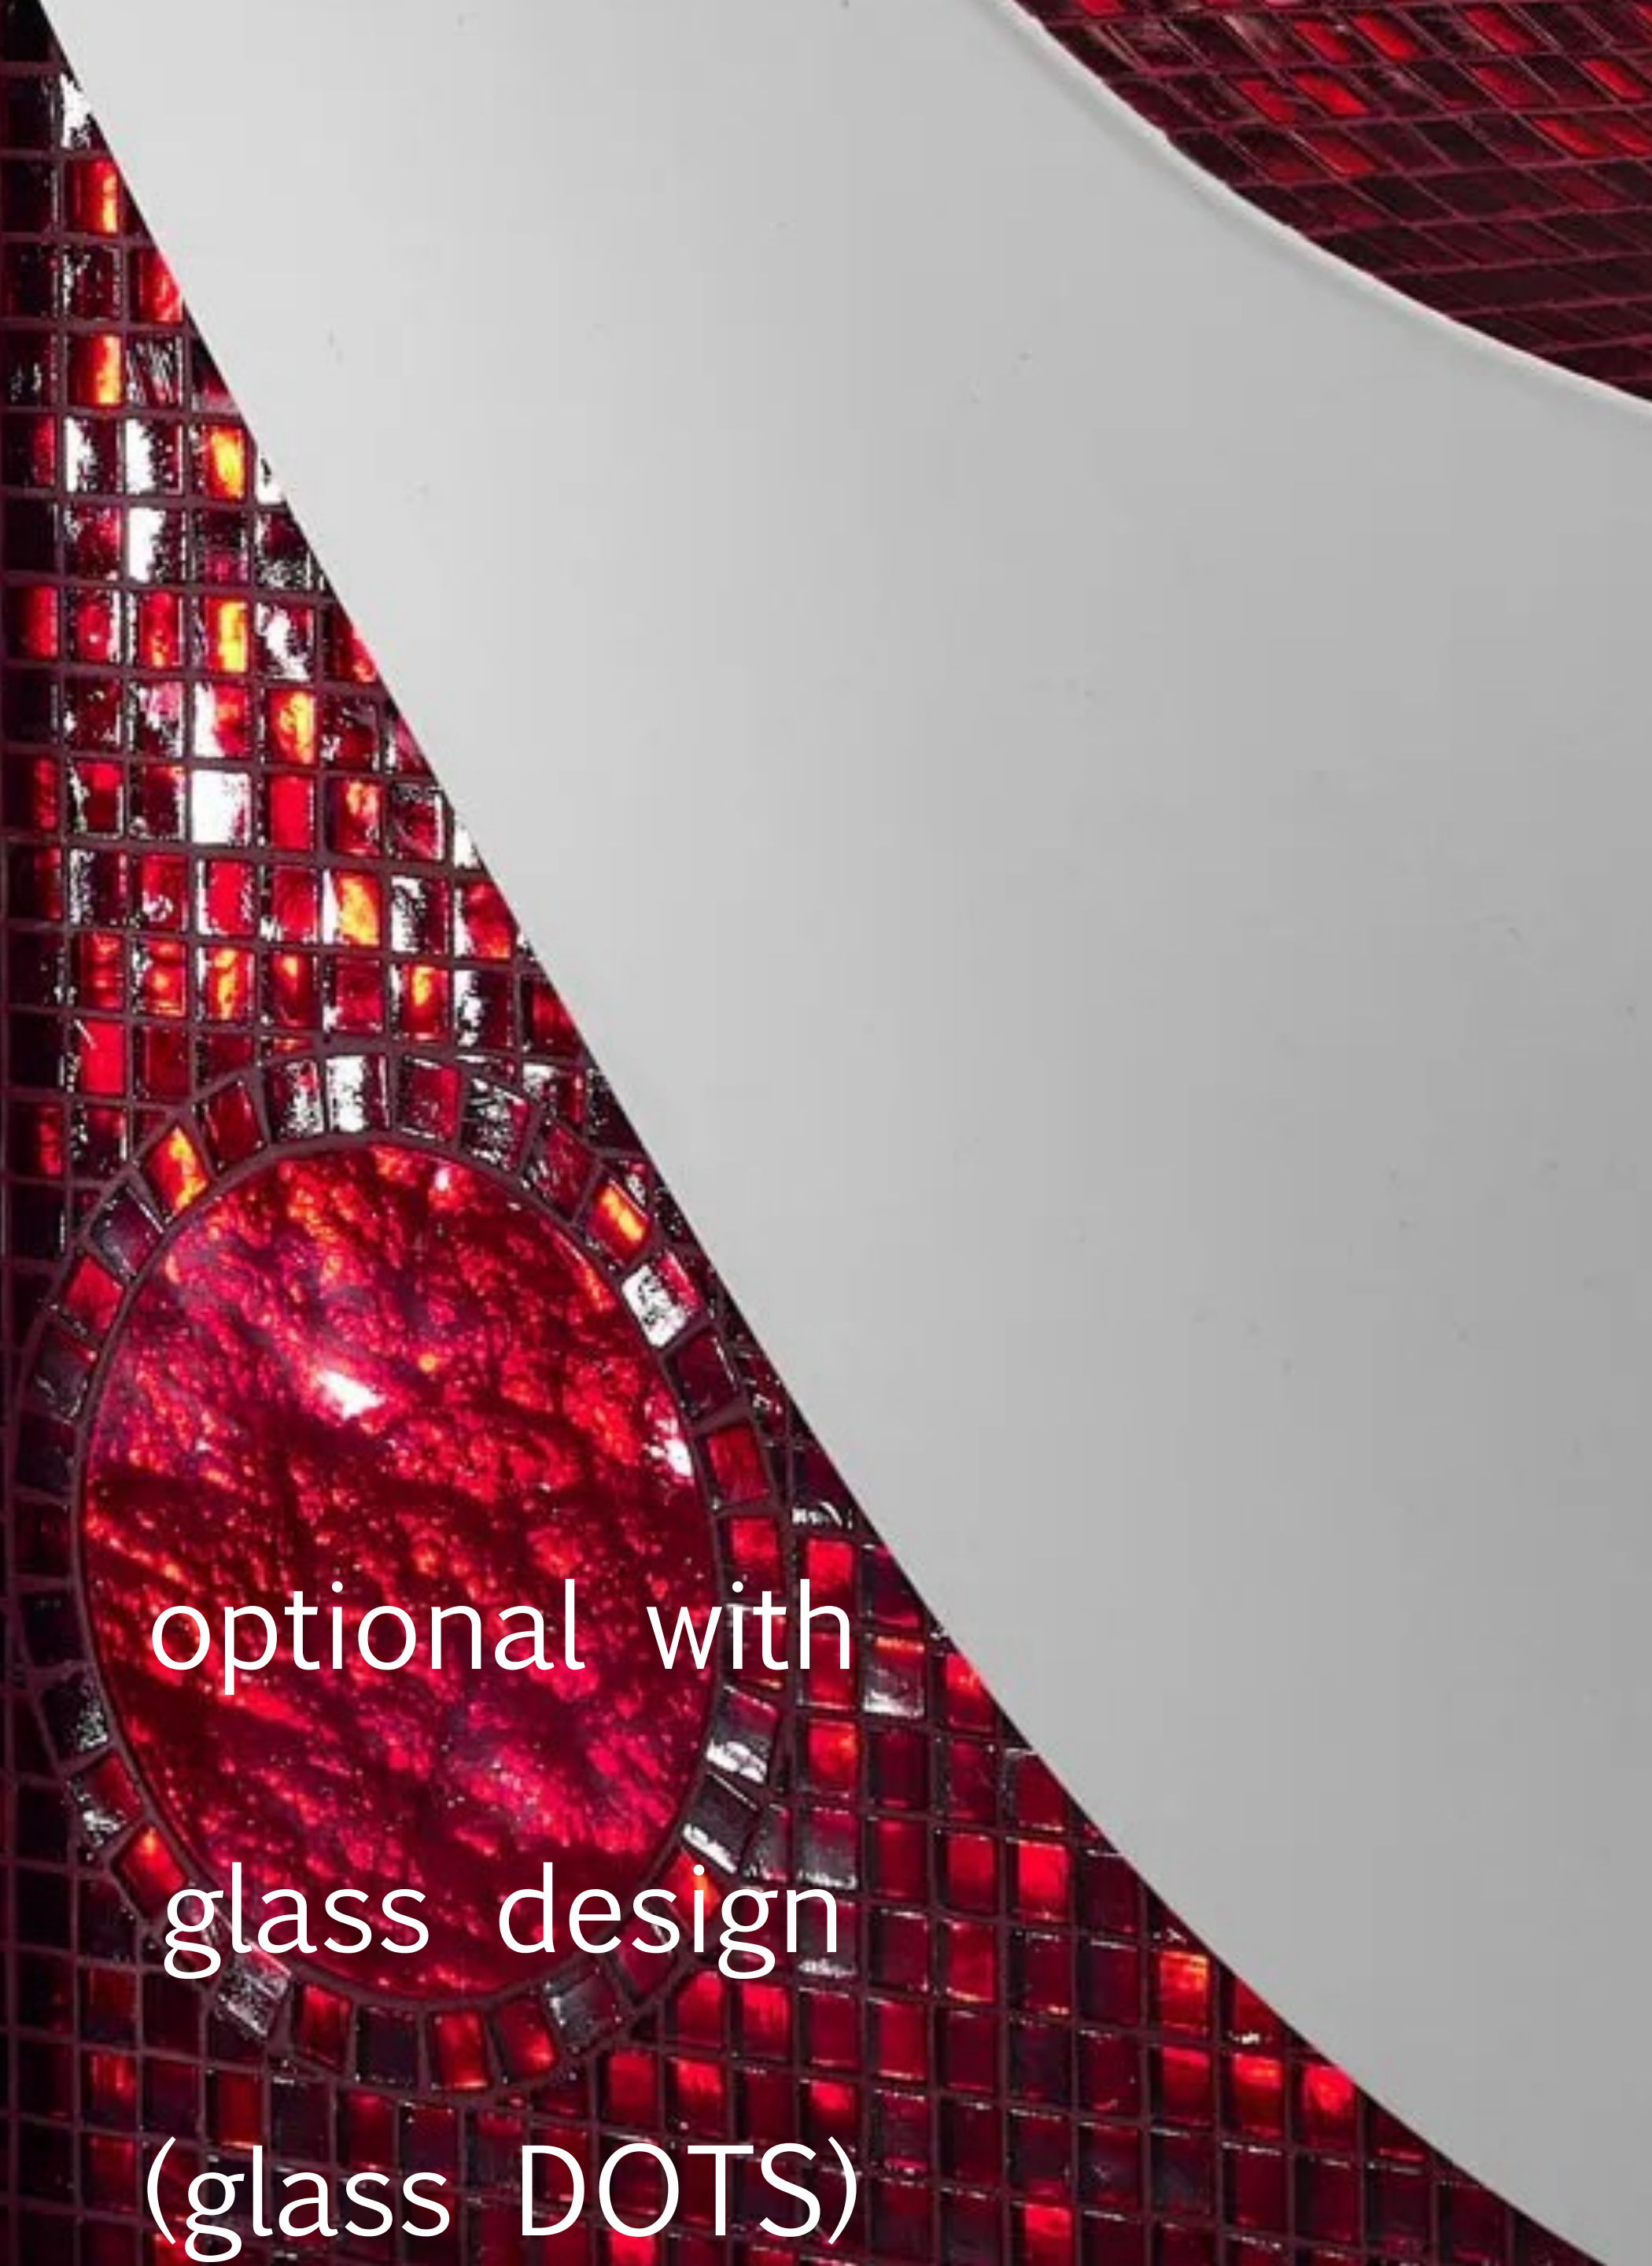

A handmade DESIGN FURNITURE

Noble glass mosaic combined with a white microcement on the side surfaces. This heat lounge guarantees the eye-catcher of the guests and users. Whether private living space or exclusive hotel area.

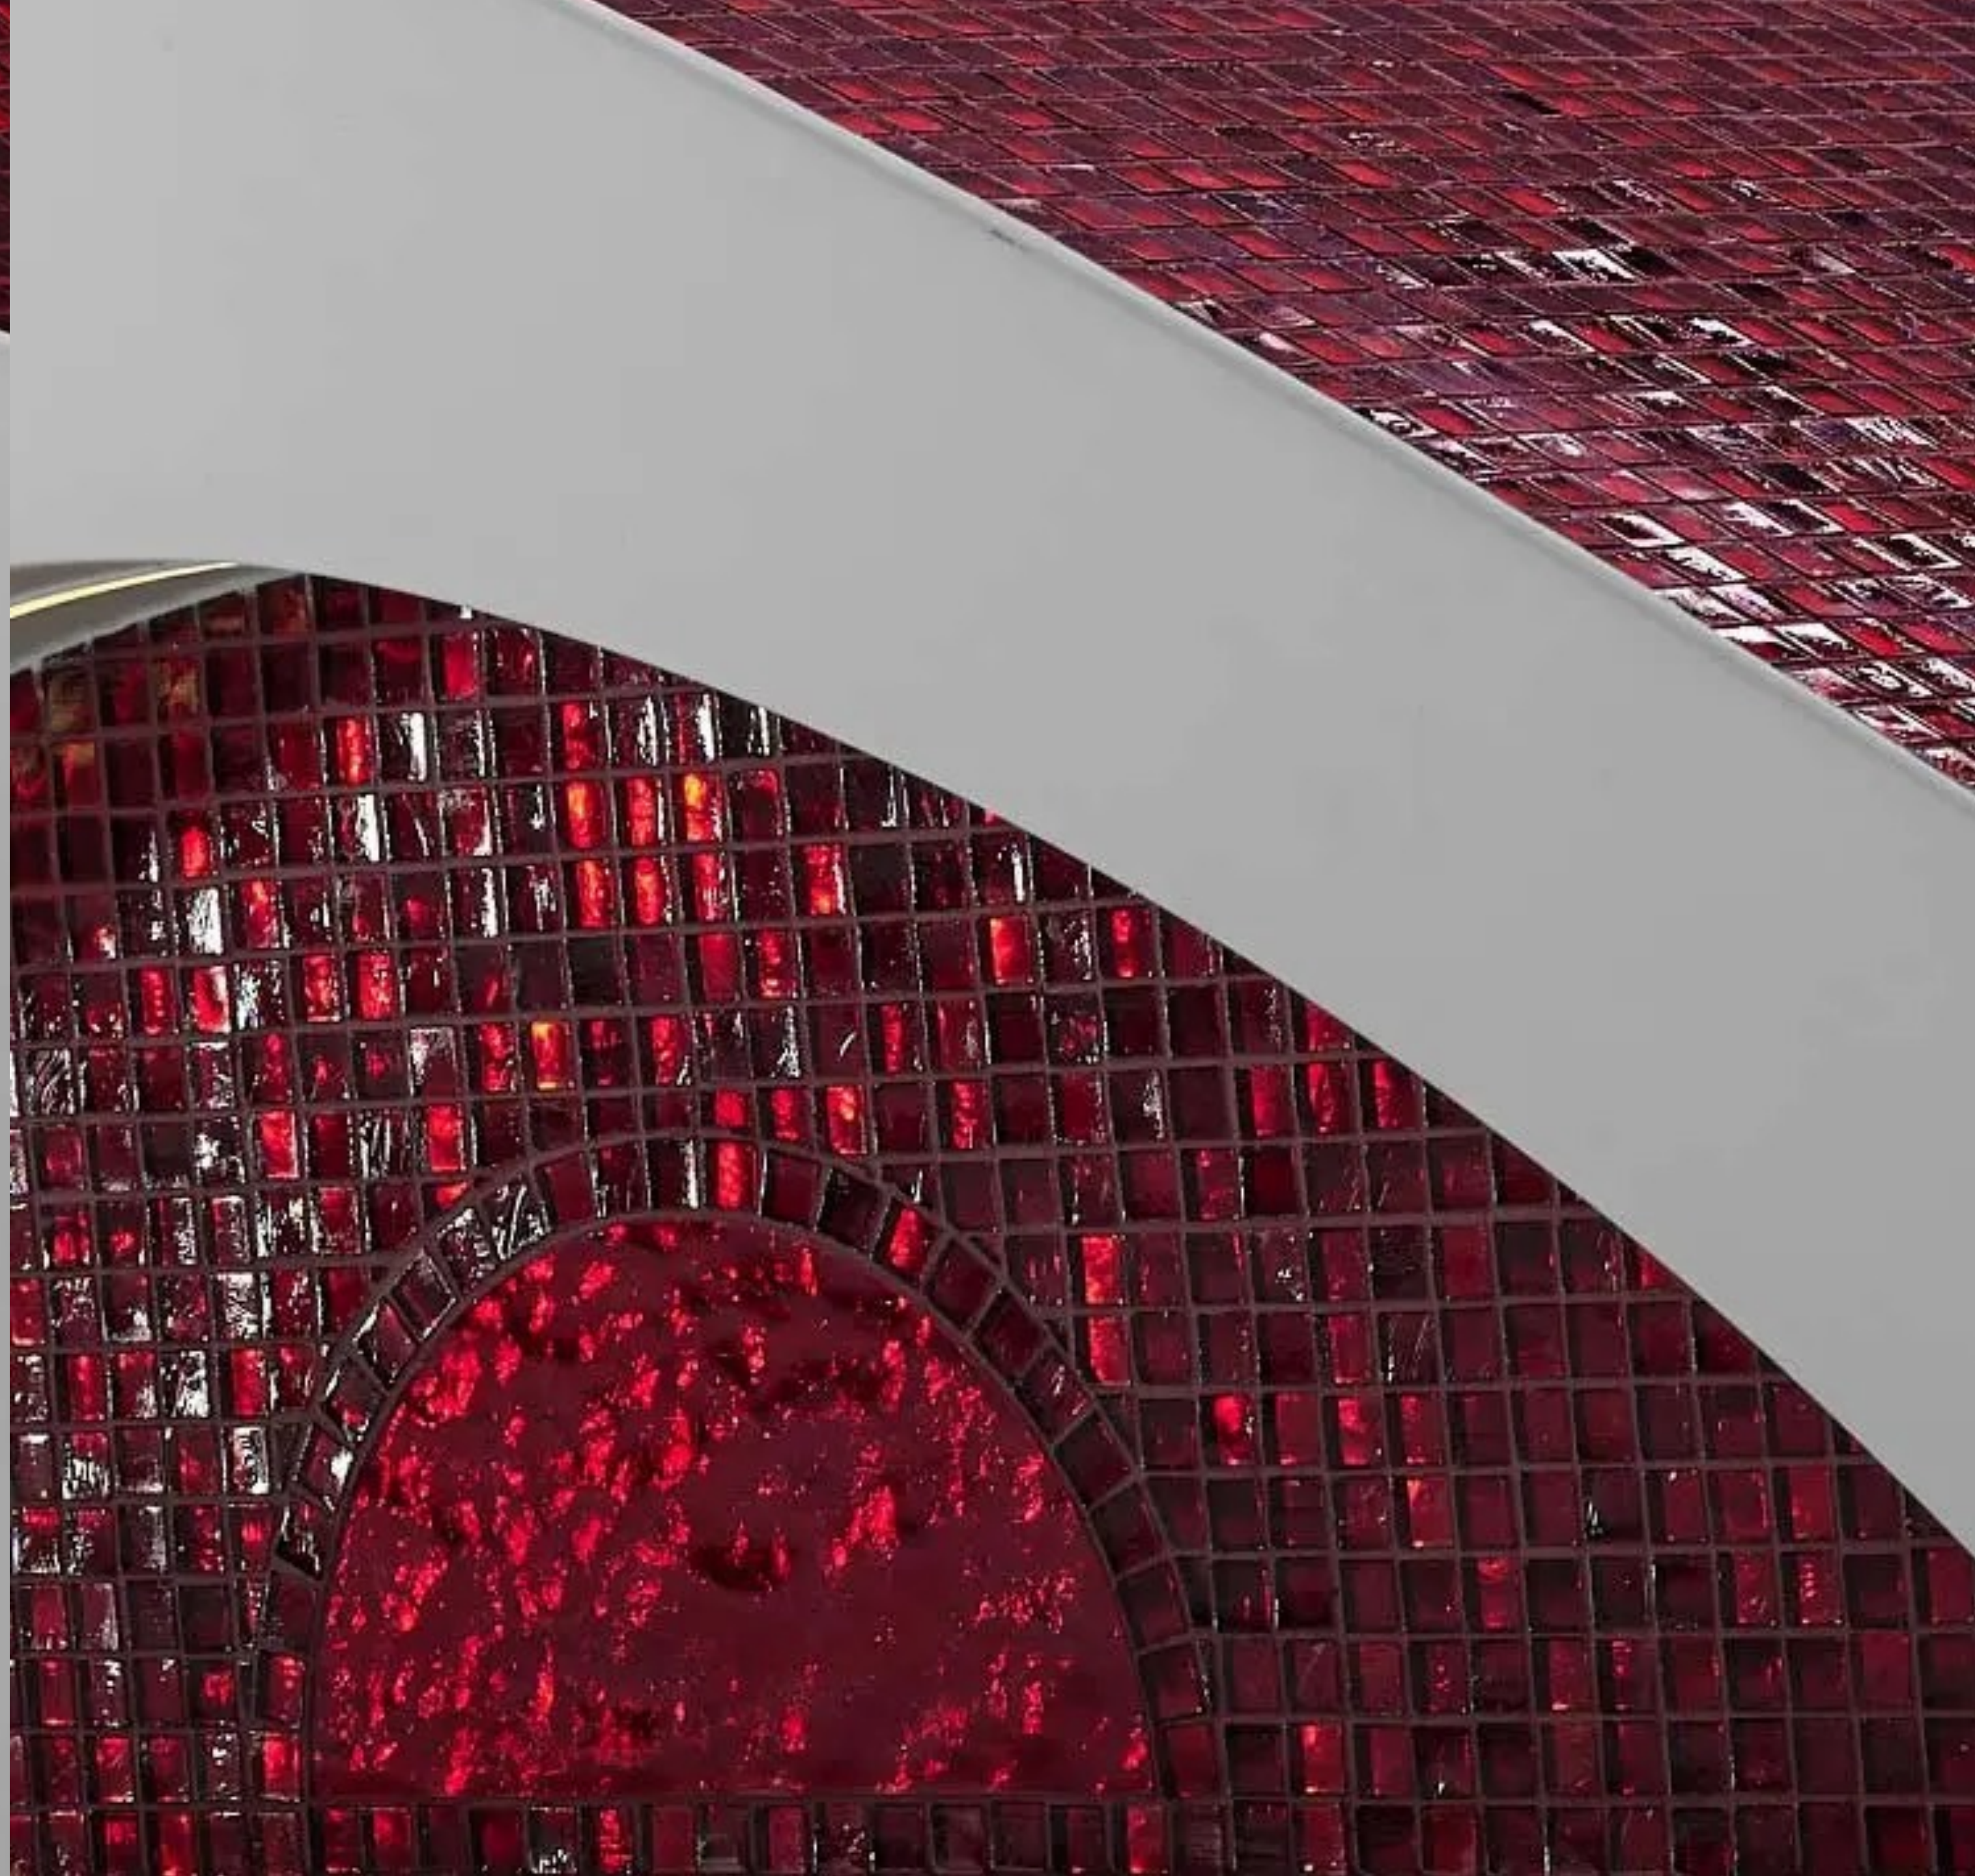

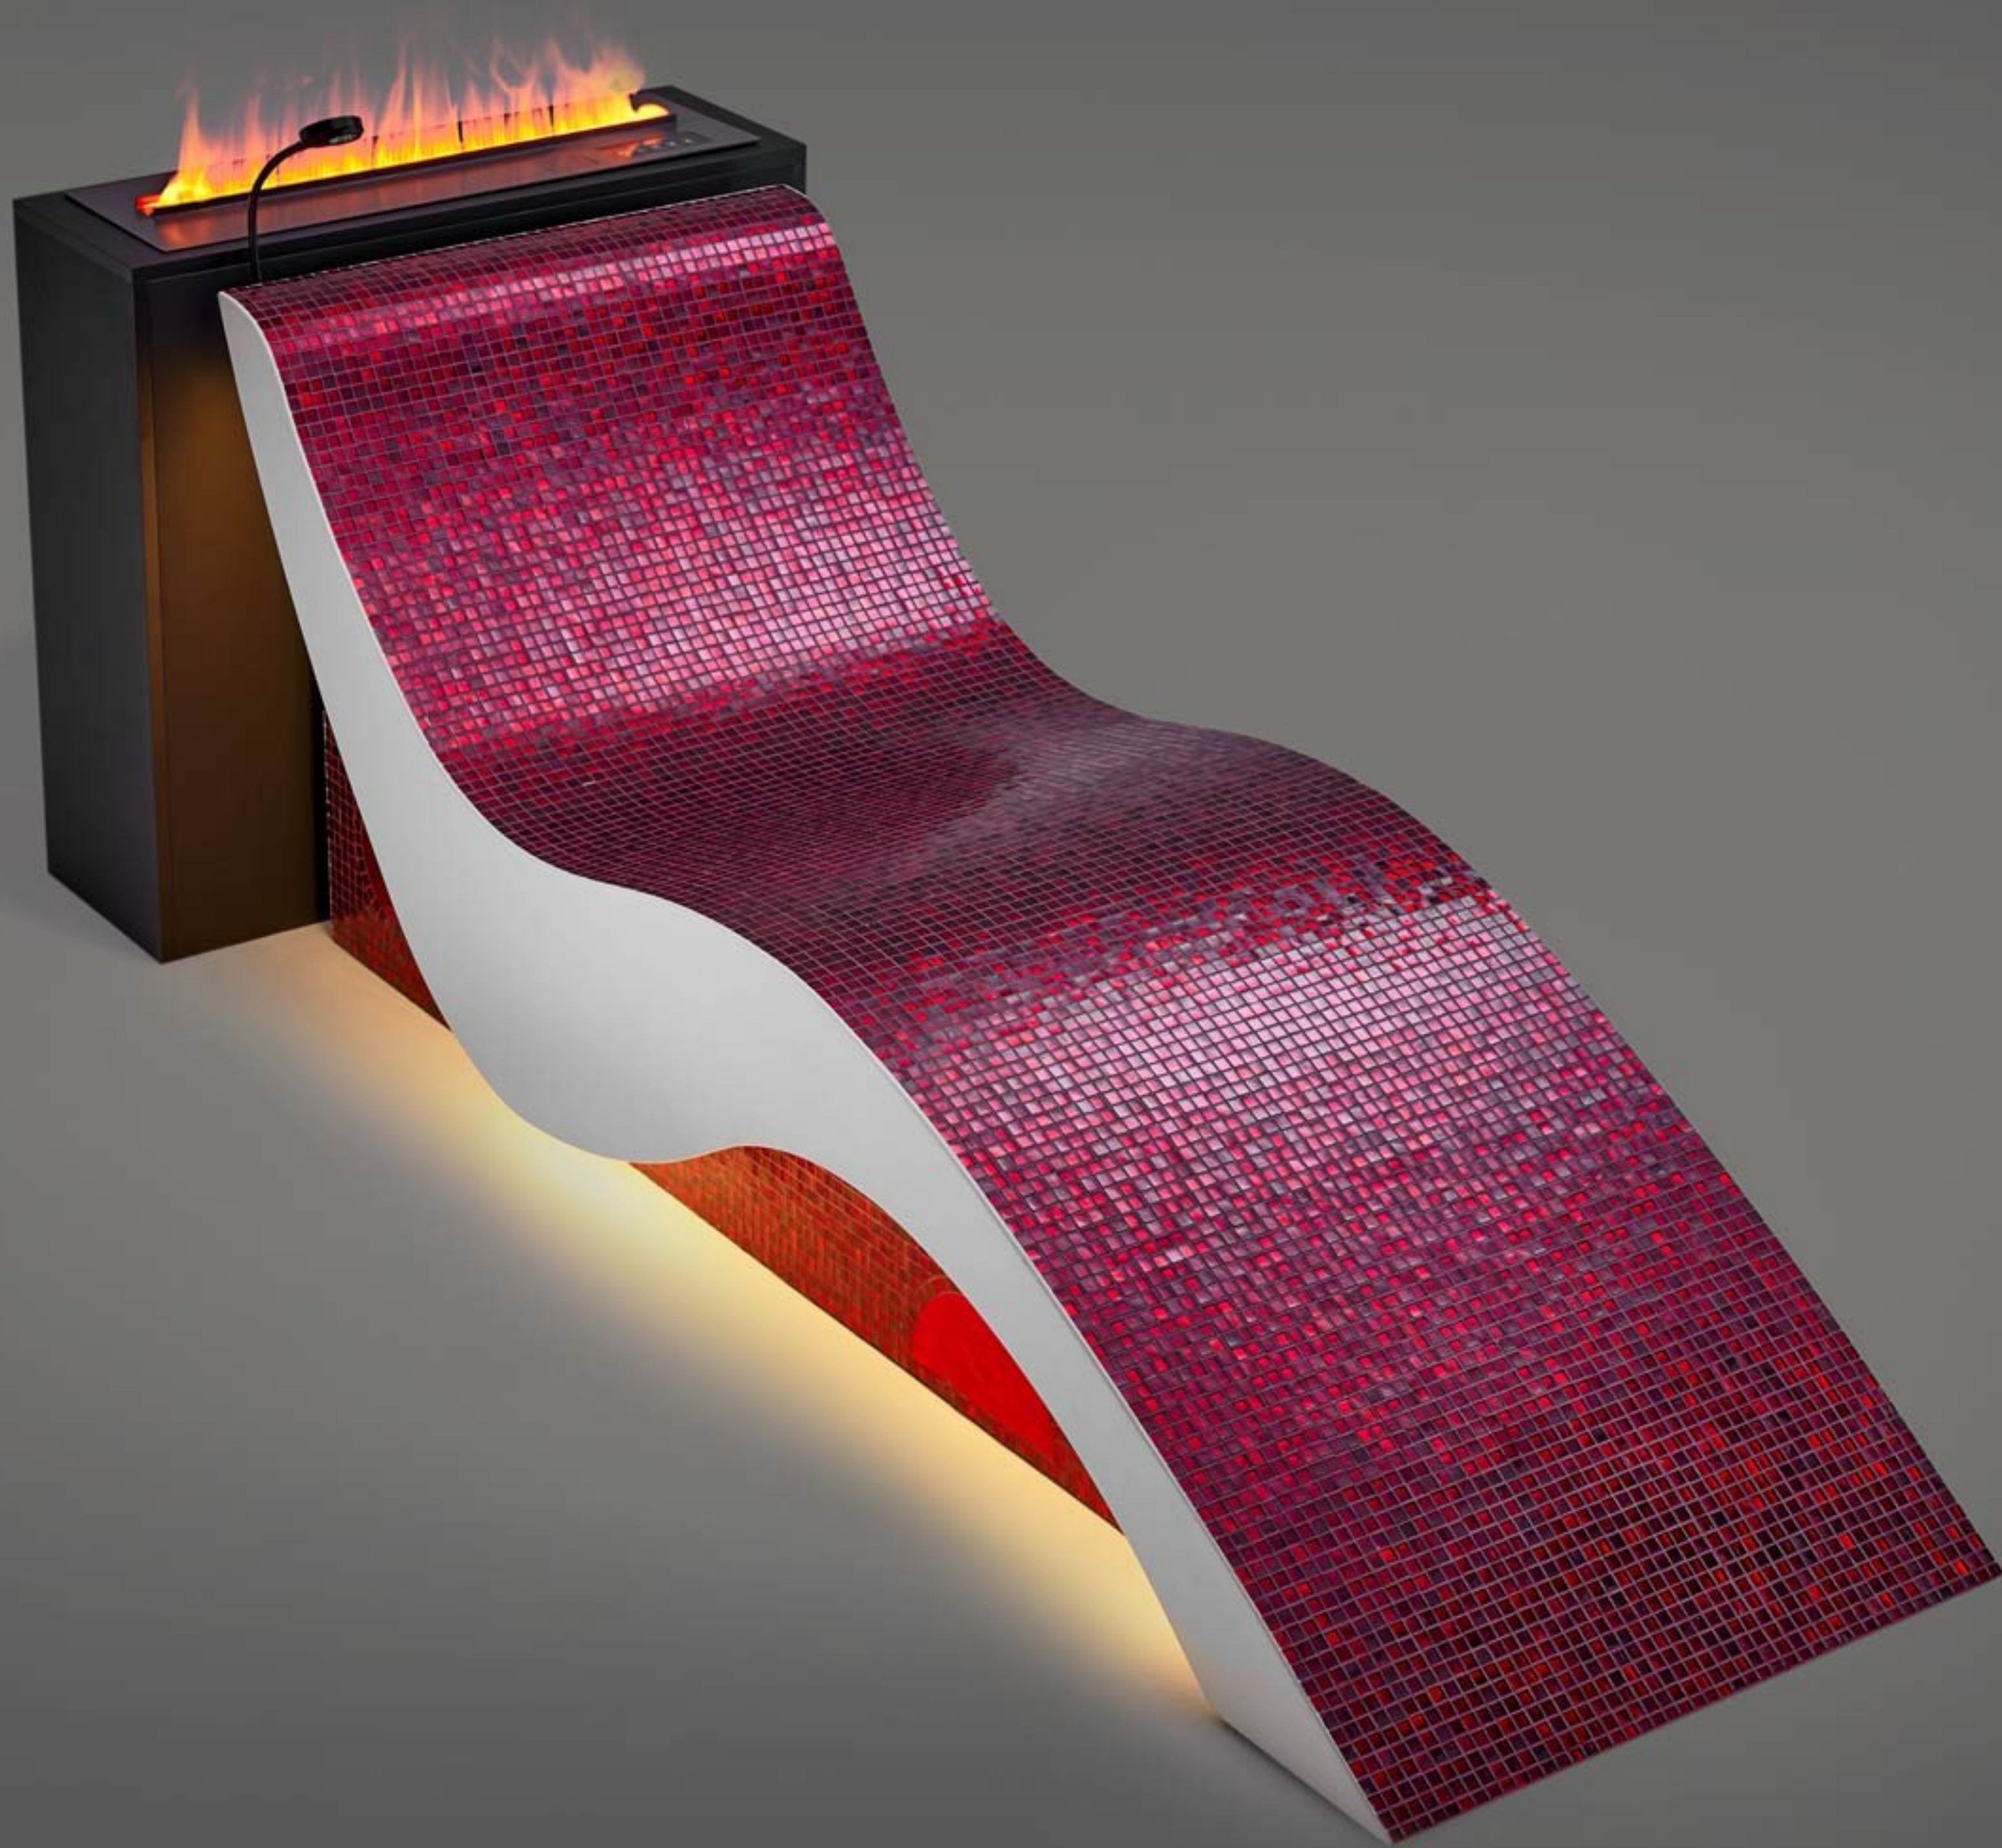

GLASS DESIGN

Artistic design: The RED ROSE infrared lounge can be produced with an artistic design in the form of large glass elements (circles, semicircles). We not only create a tiled lounge but a piece of craftsmanship. The lounge becomes an exclusive design piece of furniture with the warming function “infrared heat radiation”.

optional with
glass design
(glass DOTS)

A modern, dark-colored fire pit with a curved metal mesh front. The fire pit is filled with water, and a realistic 3D fire effect is visible behind the mesh. A small, adjustable lamp is mounted on the side of the fire pit.

optional: realistic 3D fire (ultrasonic fire)

Whether private SPA, living space or in the company or hotel sector:

These fire pits create an extremely realistic fire using ultrasonic misting

The firebox can only be filled with water

optional with reading lamp

READING LAMP

All heated loungers are available with the optional extra of a reading lamp with a USB port. The light can be switched to warm white or neutral white (dimmmable).

Heated concrete lounge “MYTHOS”

A handmade DESIGN FURNITURE in elegant anthracite

This elegant and somewhat mystical wellness lounge is something completely extraordinary. Luxurious design meets an extravagance that can easily be imagined in private SPA areas as well as in hotels.

The infrared radiation from the heated lounge has an effect on health, just like solar radiation. The radiation can promote blood circulation, help with colds as well as tension or rheumatism and help with skin problems. A temperature is set here that seems comfortable to you (slightly above blood temperature). However, the setting can be made within a very wide range of 30-45°C. A good standard value is around 37°C.

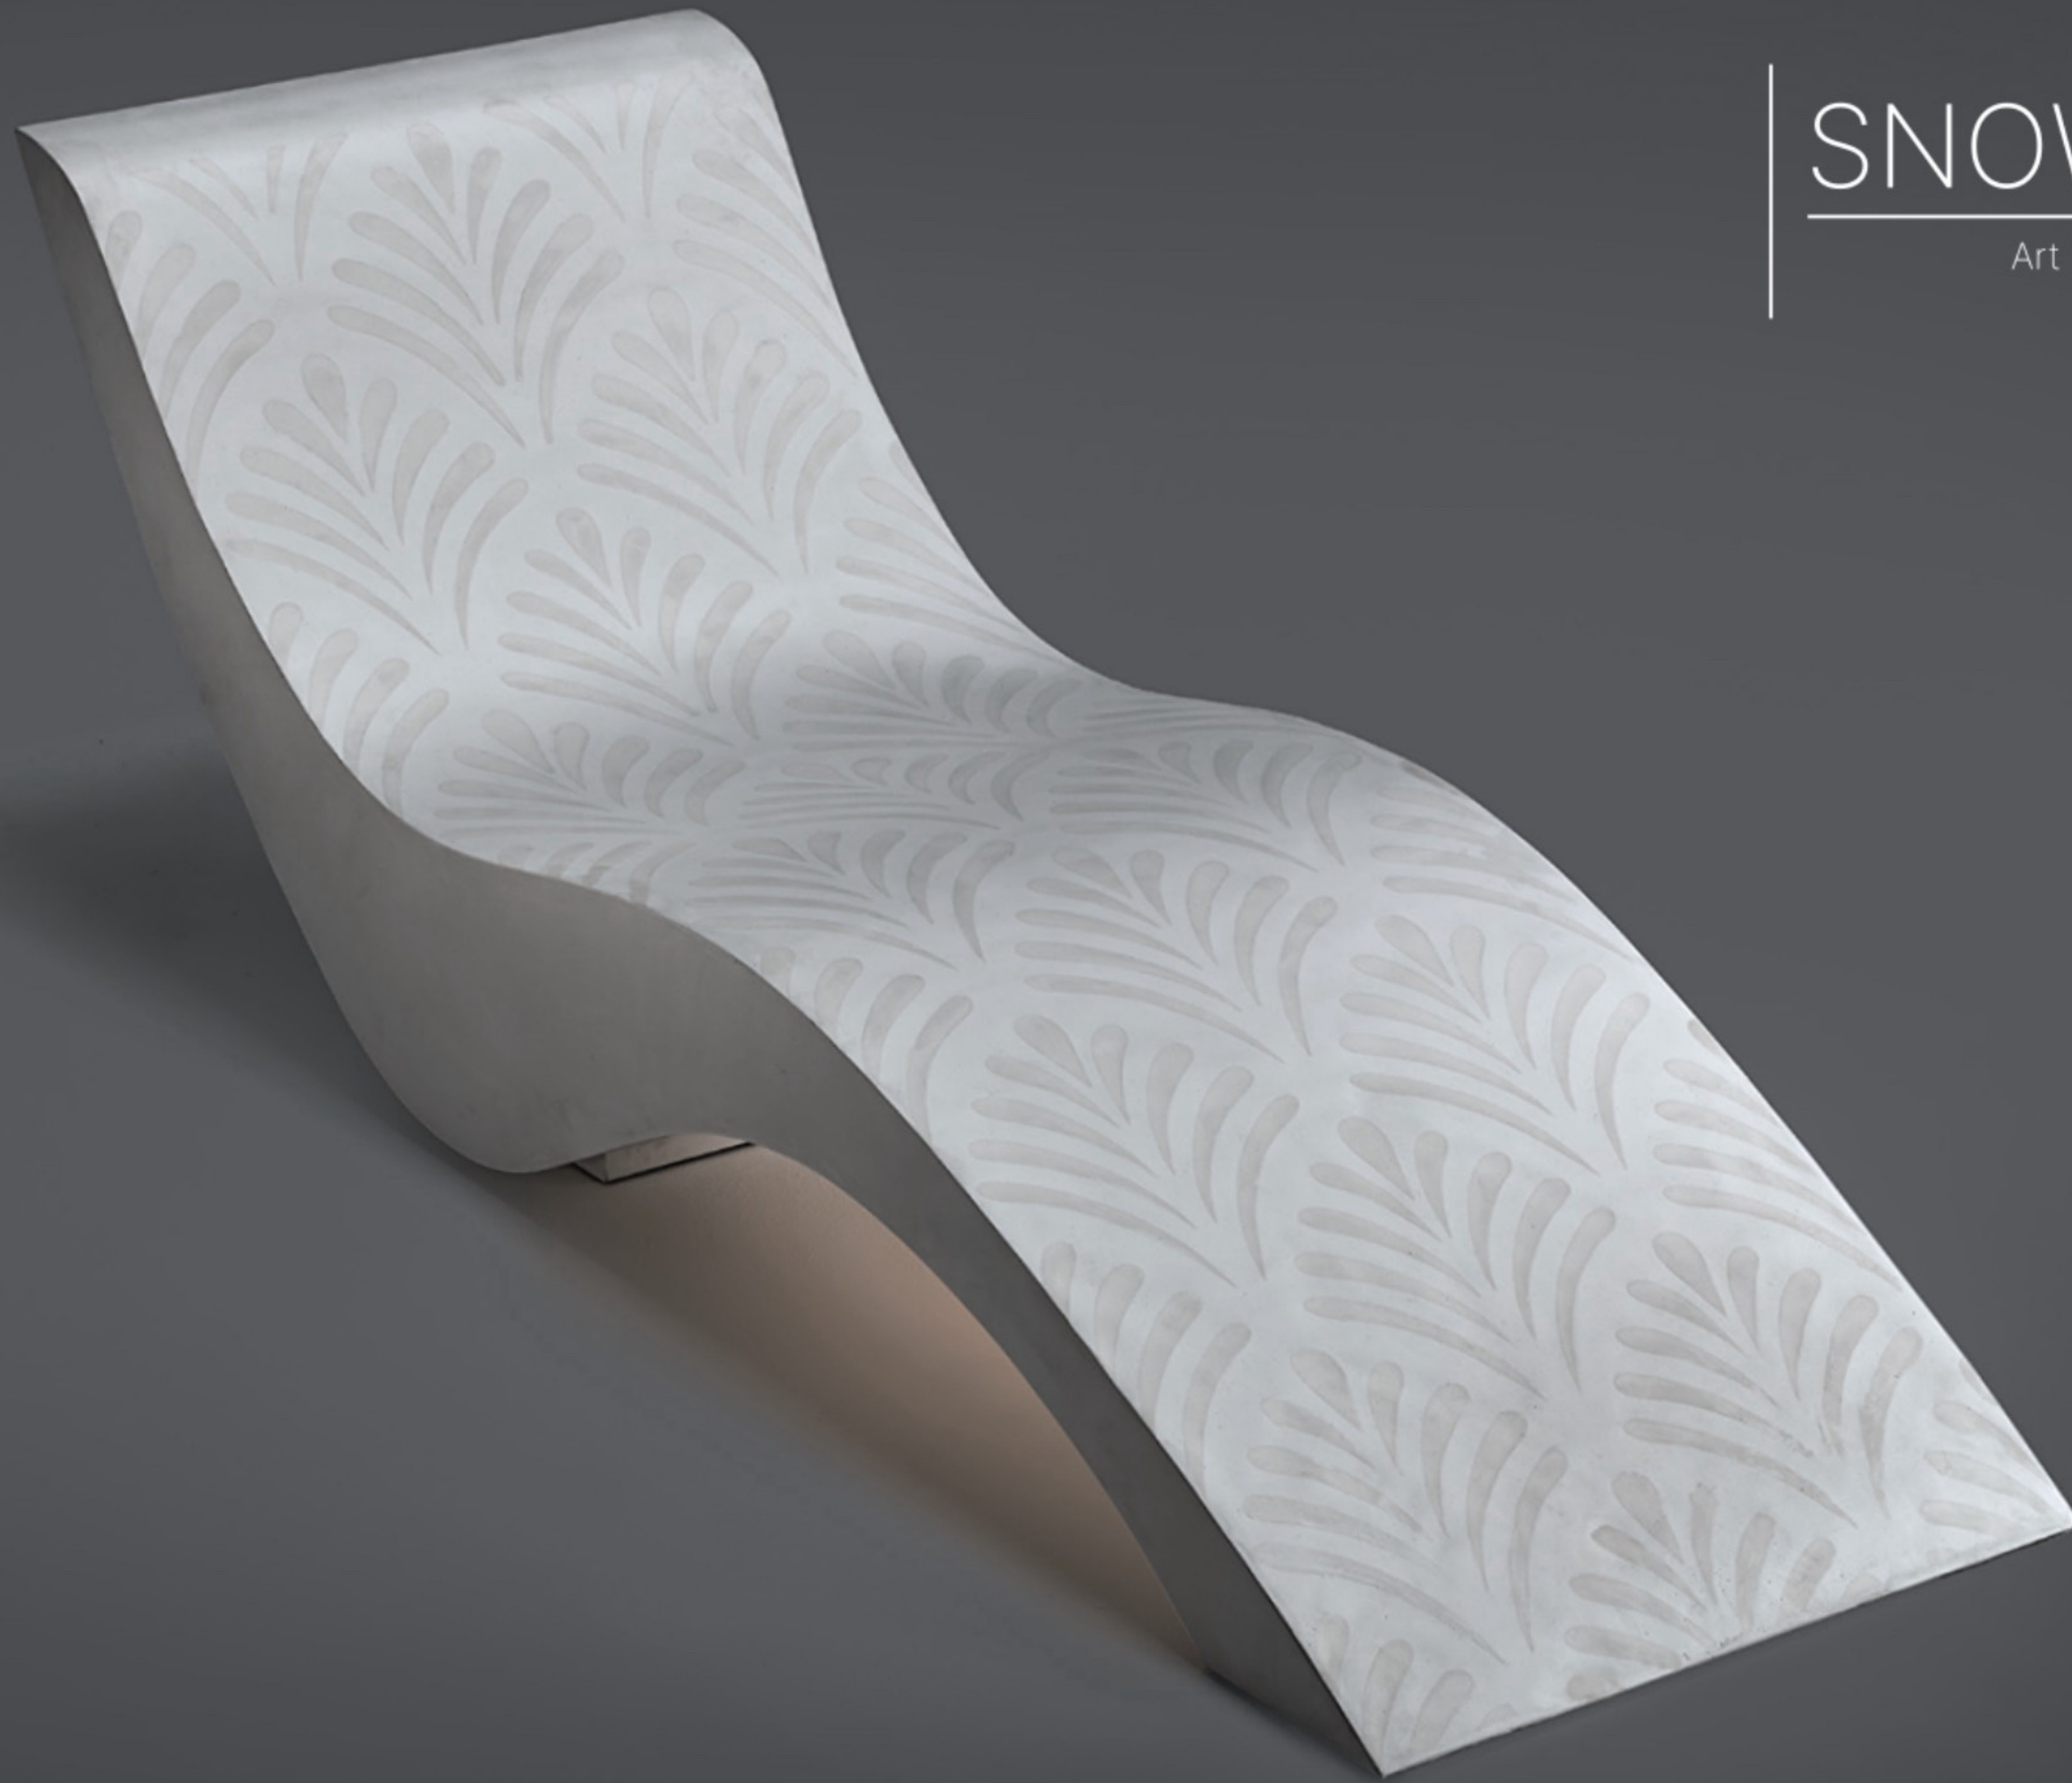

A handmade lounge in a concrete look in black/anthracite which gracefully integrates into the room concept.

SOLEUM

SNOWWHITE

Art by SOLEUM©

Heated concrete lounger “SNOW WHITE”

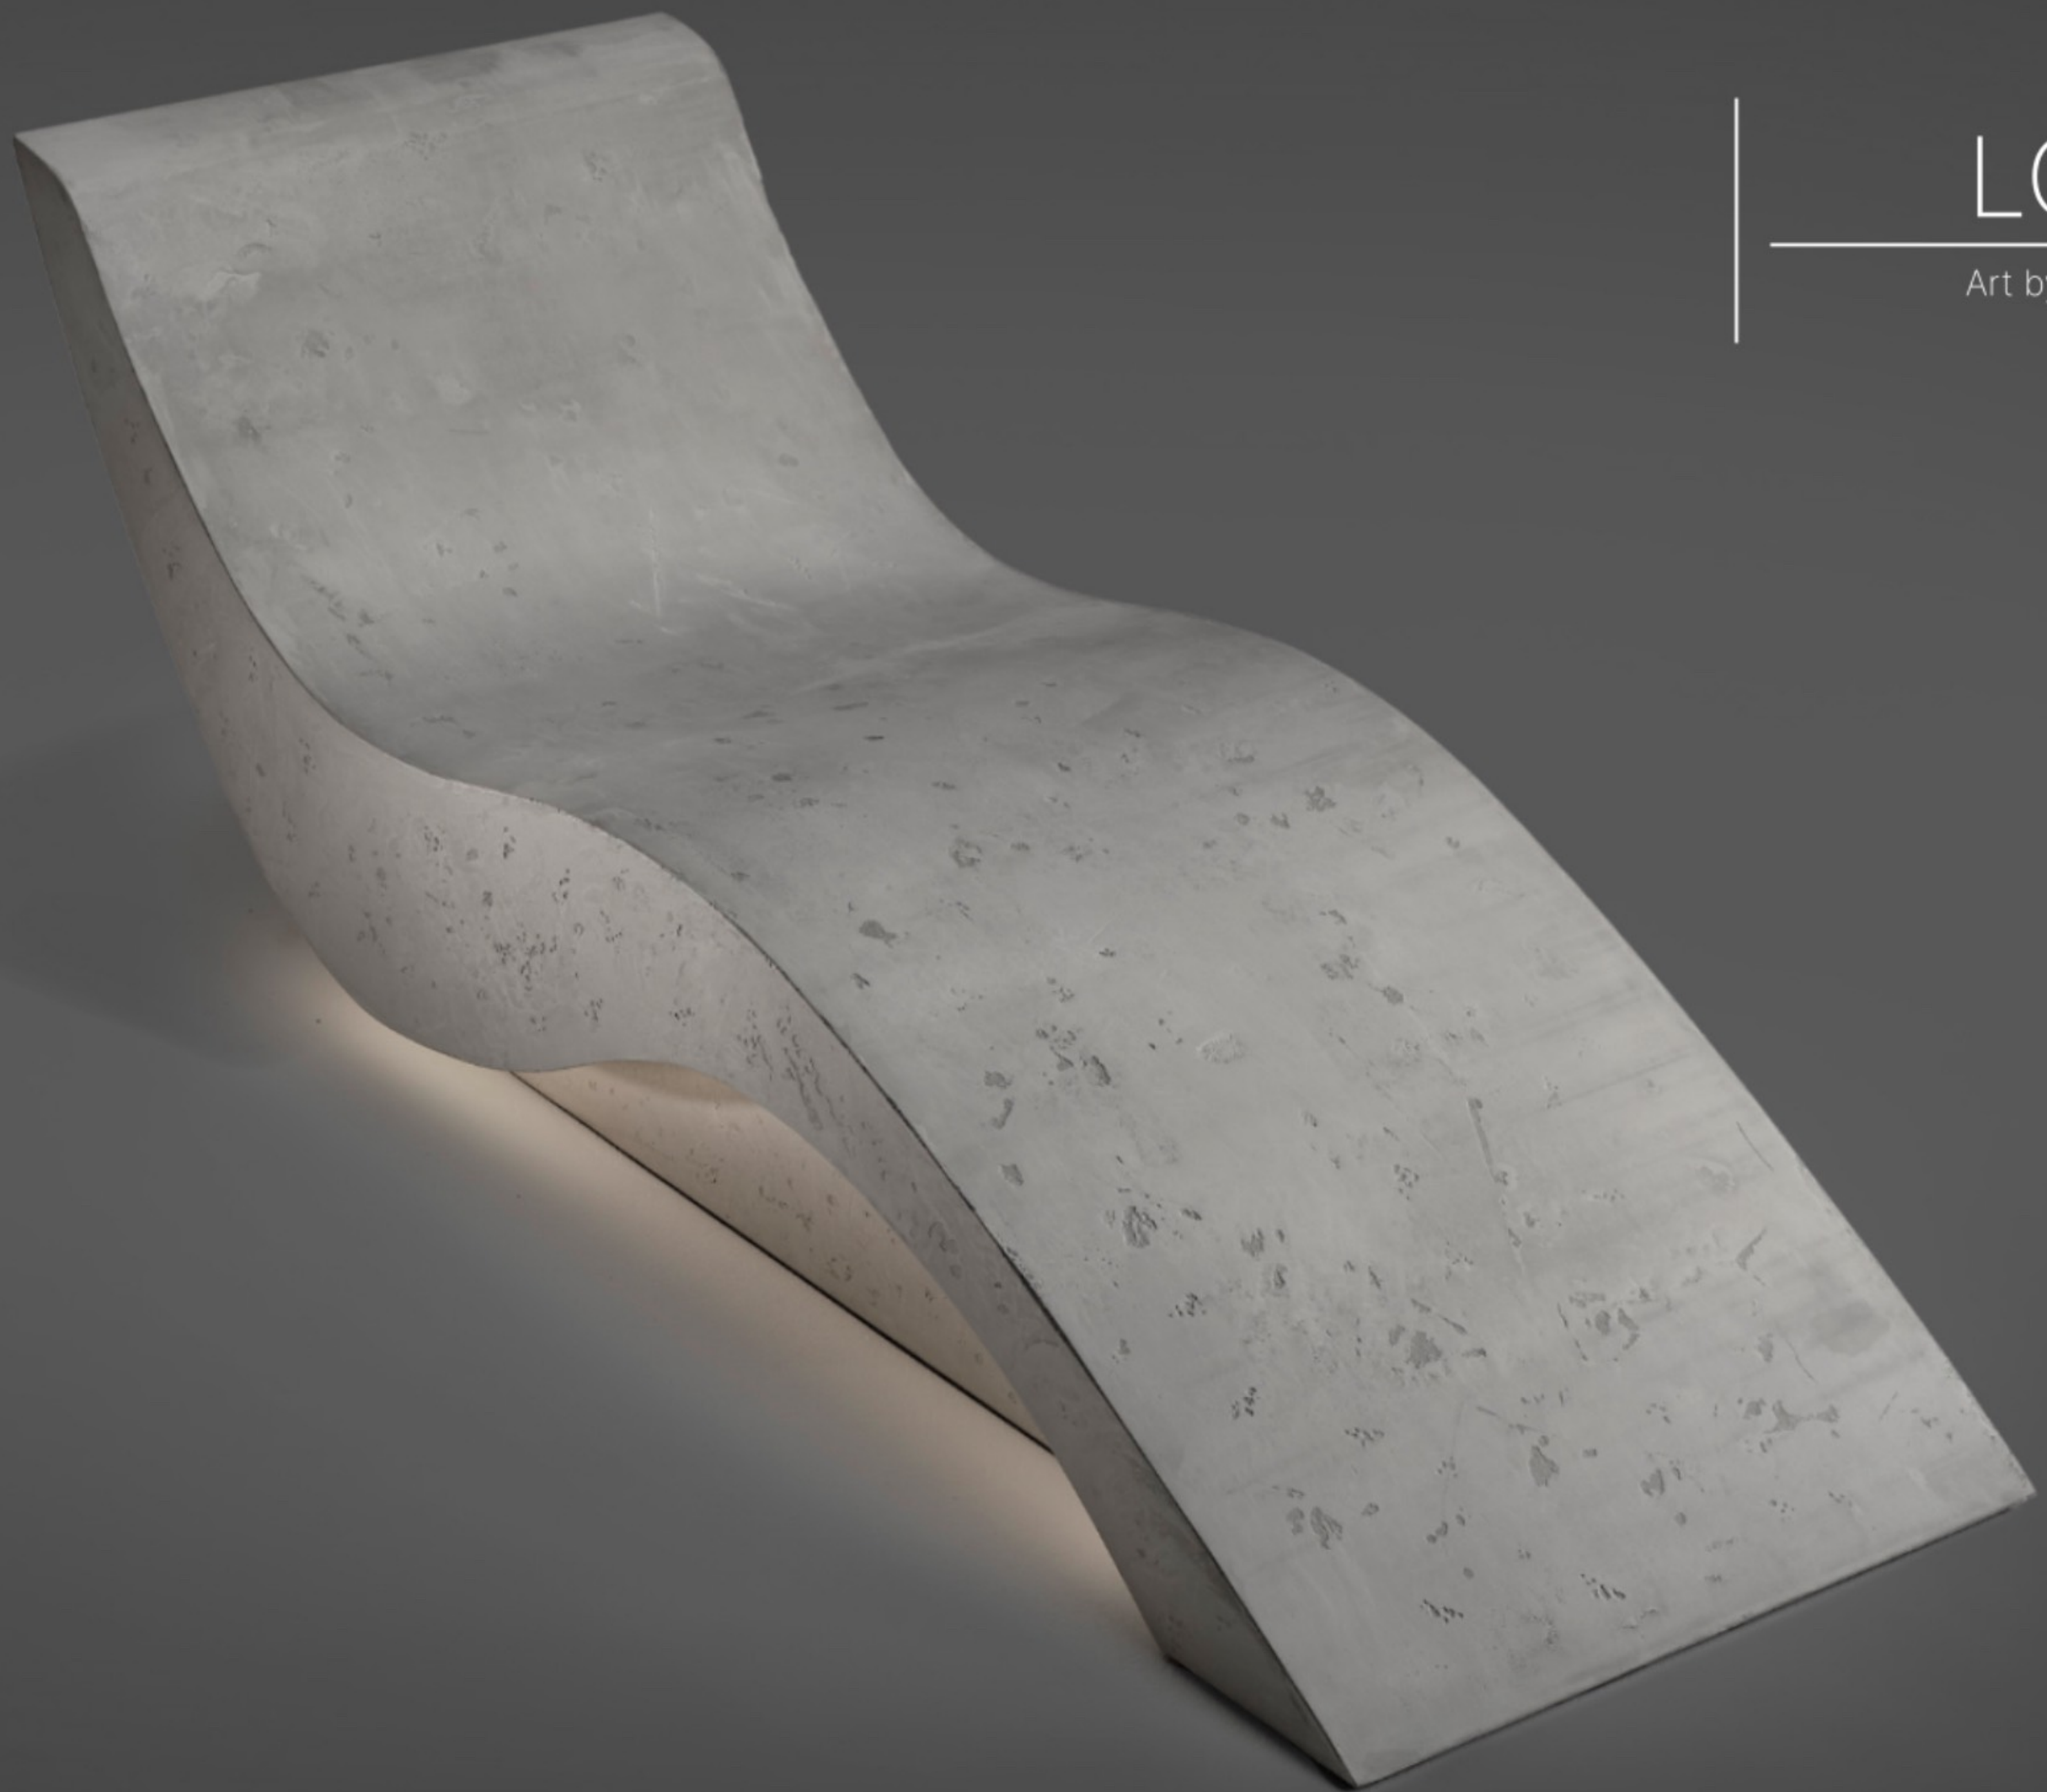

Puristic – white concrete

A heated lounger with a difference. The sober white microcement on this wellness lounger is puristic and elegant. With its charm of a pearl and the innocent white of a snowflake, it noticeably trumps other designs. When you touch the surface, your first admiration sets in. An external coolness should not lead you to believe that this beautiful specimen will not pamper you with a very pleasant warmth from the inside. Self-adjustable, you can adjust the desired temperature and relax at it and create space for your dreams.

“Snowflakes” option: The finest handwork adorns this model.

The infrared radiation from the heated lounger has an effect on health, just like solar radiation. The radiation can promote blood circulation, help with colds as well as tension or rheumatism and help with skin problems. A temperature is set here that seems comfortable to you (slightly above blood temperature). However, the setting can be made within a very wide range of 30-45°C. A good standard value is around 37°C.

Concrete look heated lounge “LOVT”

Architect lounge LOVT

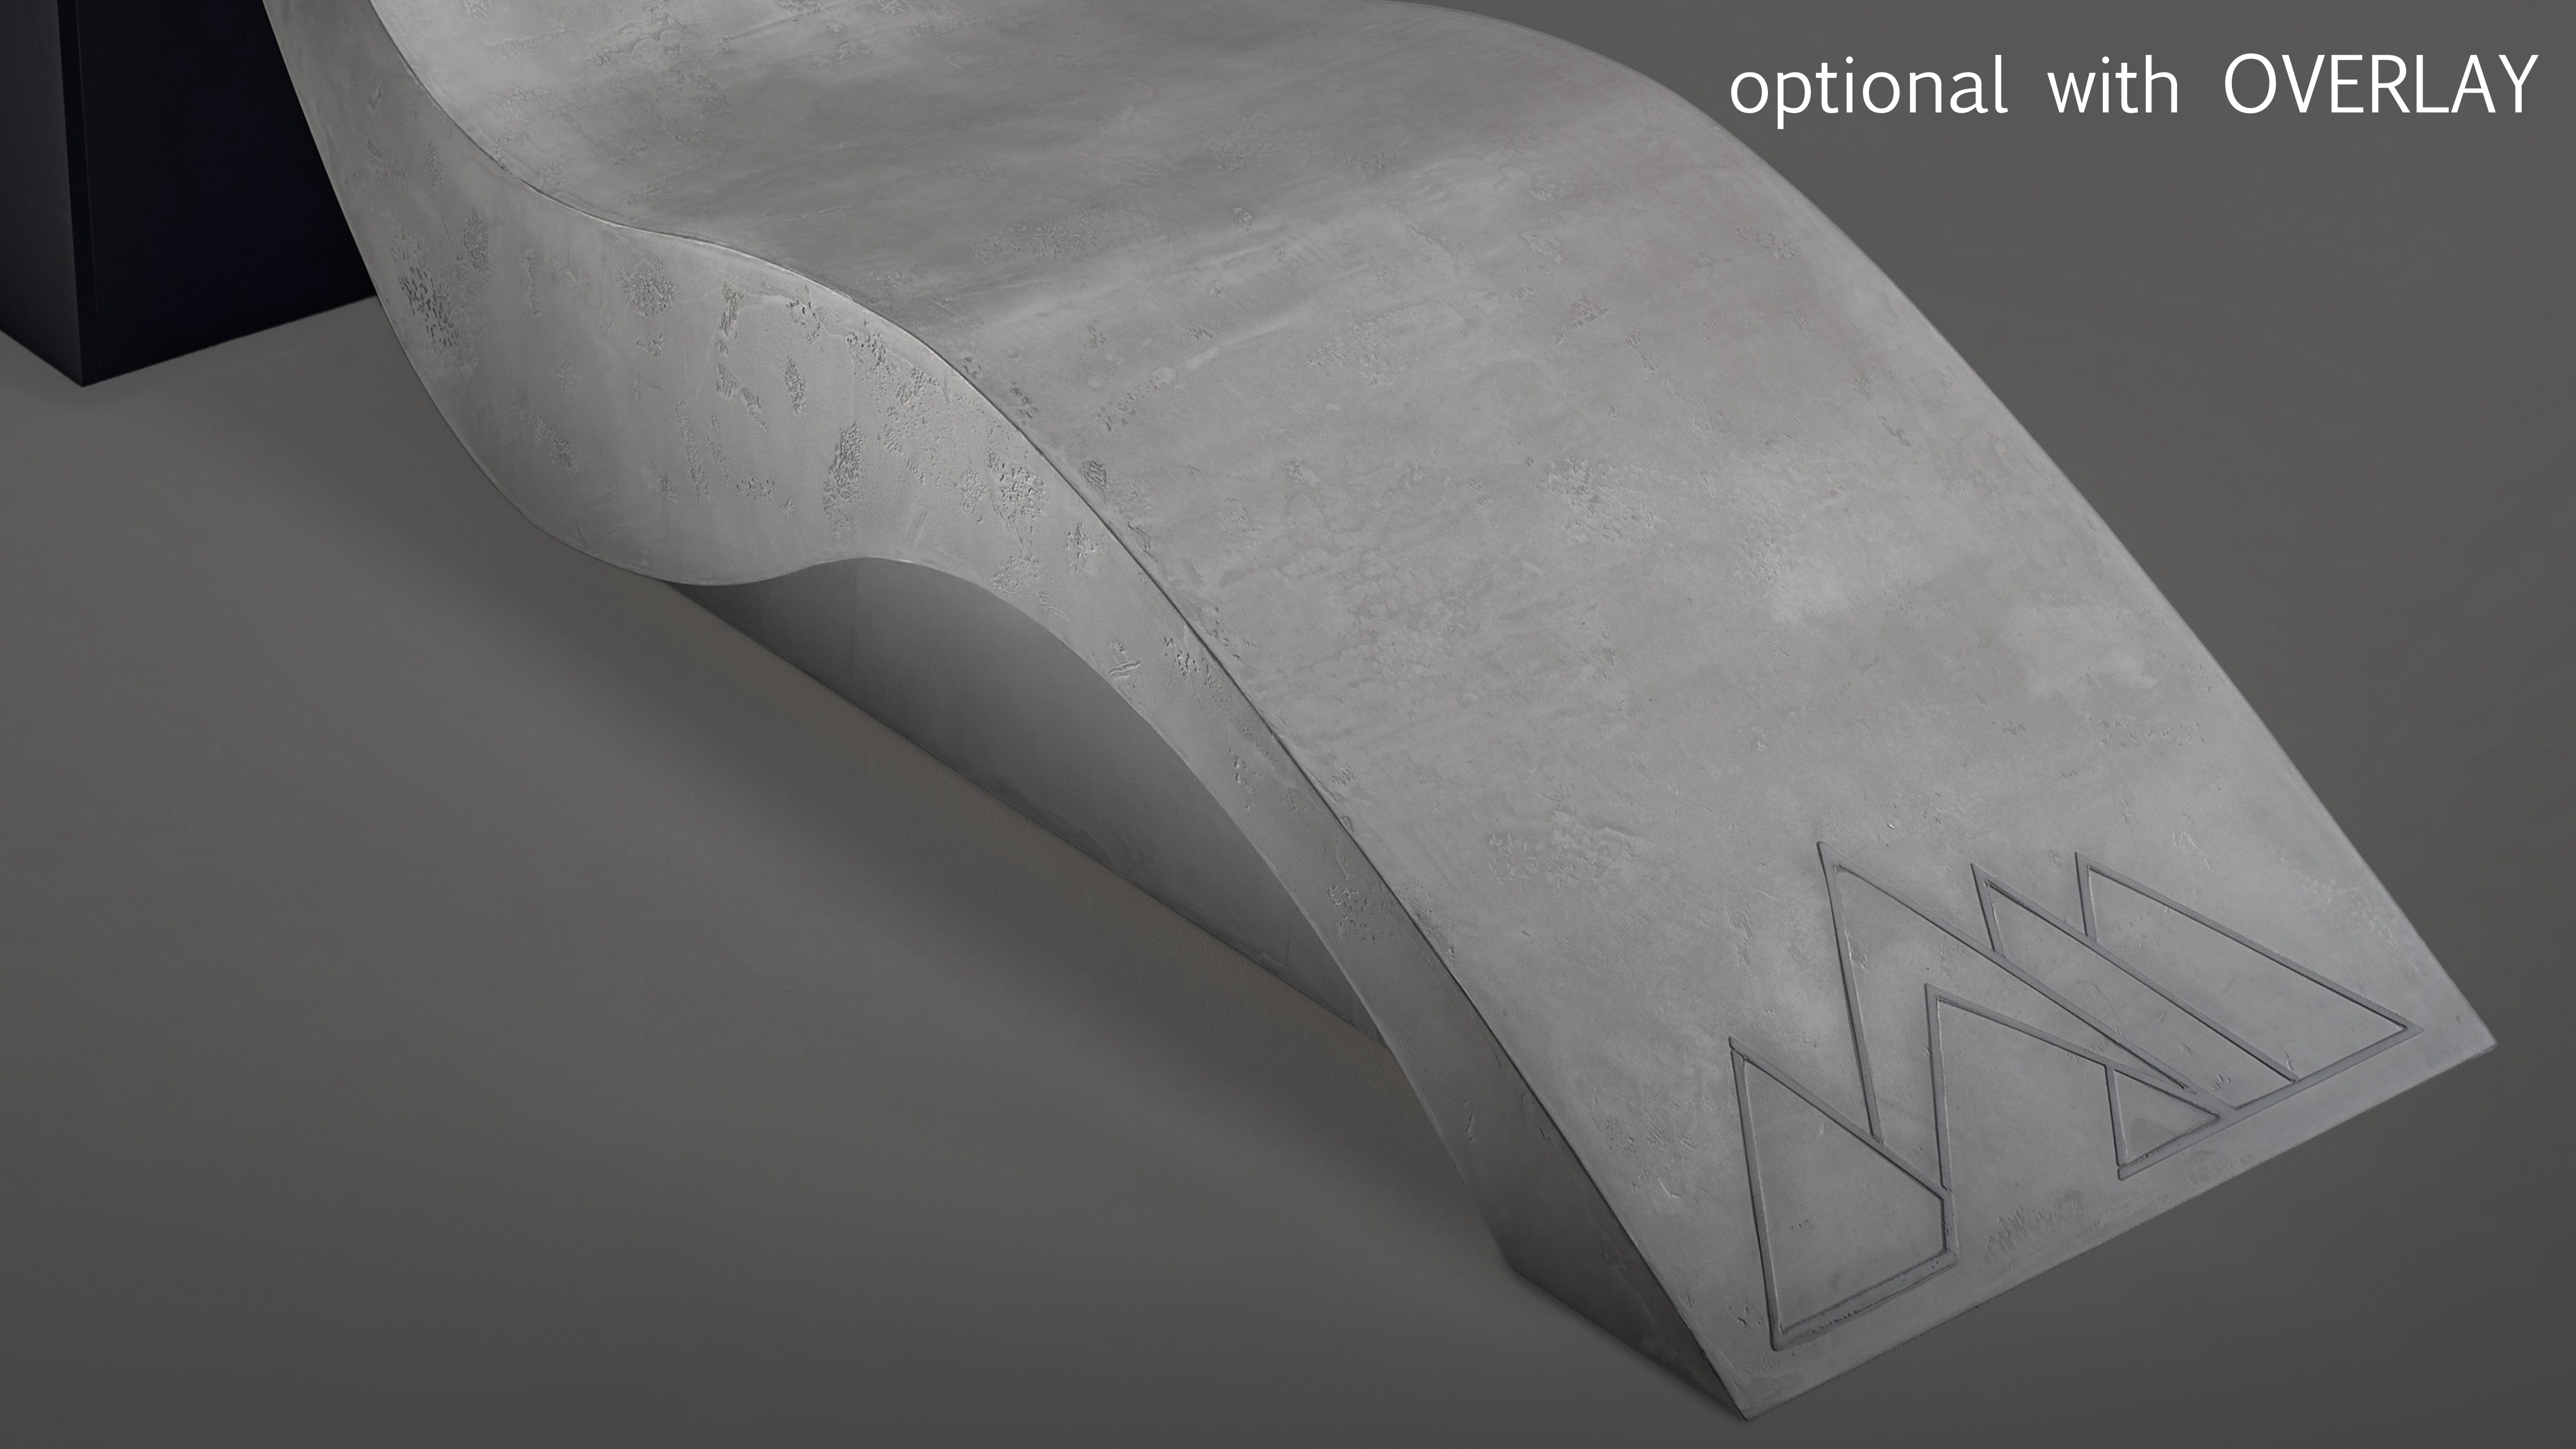

With the LOVT lounge we set accents and see this exclusive piece of furniture as a complement to contemporary architecture.

We offer OVERLAYS on the lounge. An overlay is an additional coating with a design element. This can be a hotel logo or a company logo – commercial or private branding.

HANDMADE CONCRETE LOOK STRUCTURES

We give the lounge a great concrete look by manually coating it with microcement. Individual structures emerge depending on the processor and pattern.

optional with OVERLAY

The LAGOON heated lounge for your hotel SPA

High-quality designer SPA lounge in a class of its own

The mild radiant heat via the shiny glass mosaic with its unique effect on our well-being. Perfect relaxation in a luxury tiled lounge. Timeless design, ergonomic shape, easy-care durability – these heated lounge chairs are real works of art that perfectly complement the upscale hotel SPA area or even the private wellness area.

Thanks to the elegant, hand-made Italian glass mosaic, the lounge shines with a special shine from every direction.

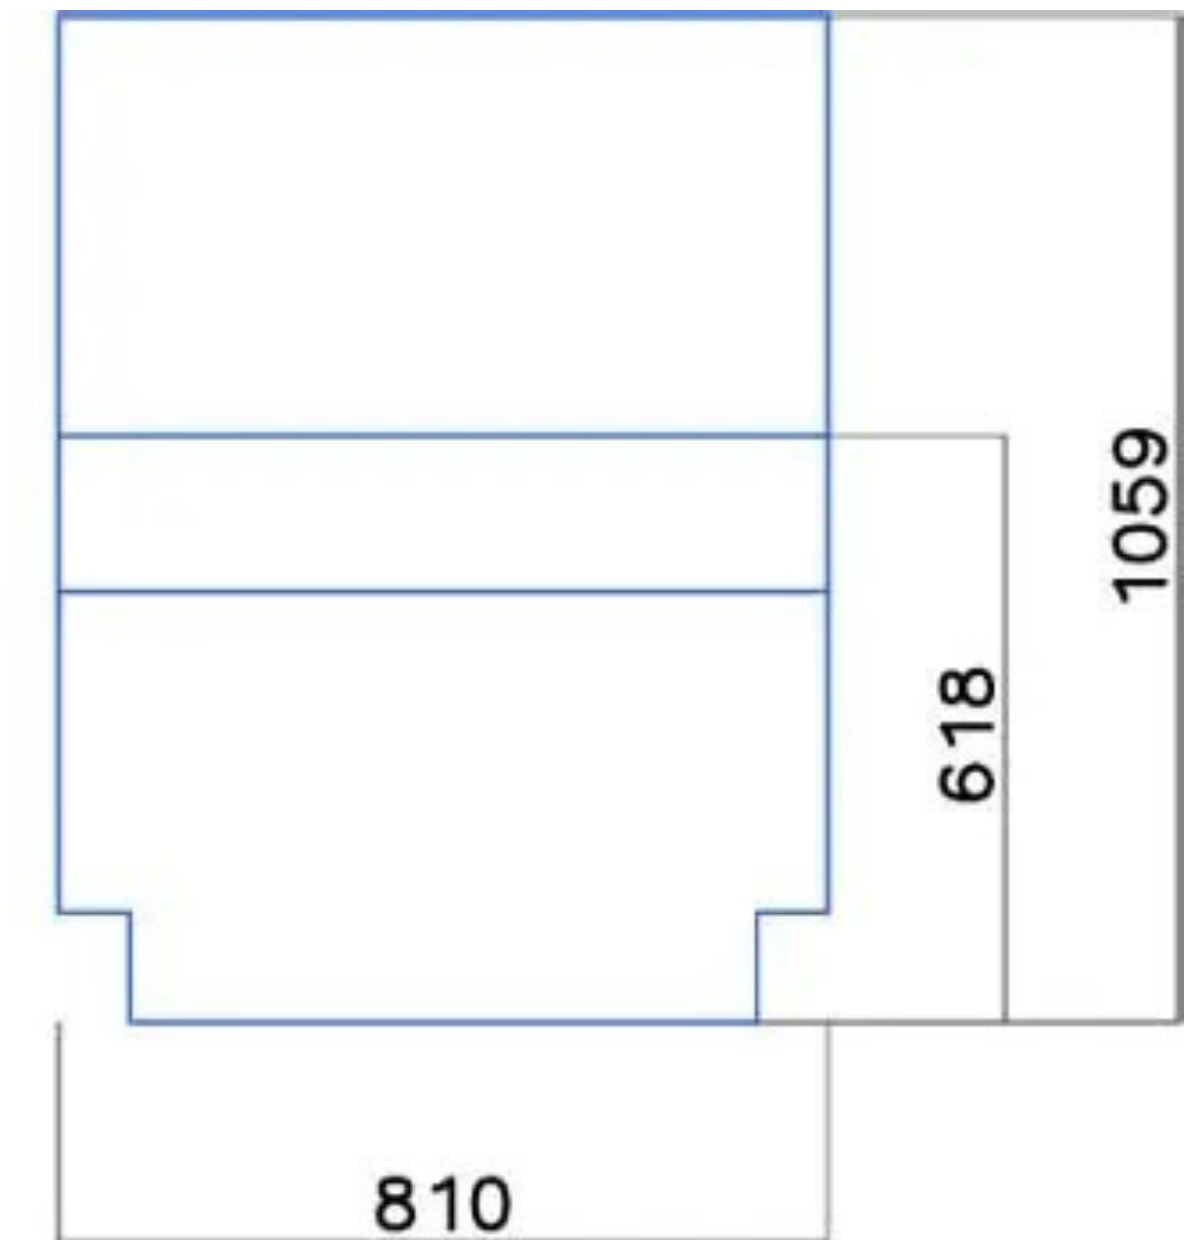

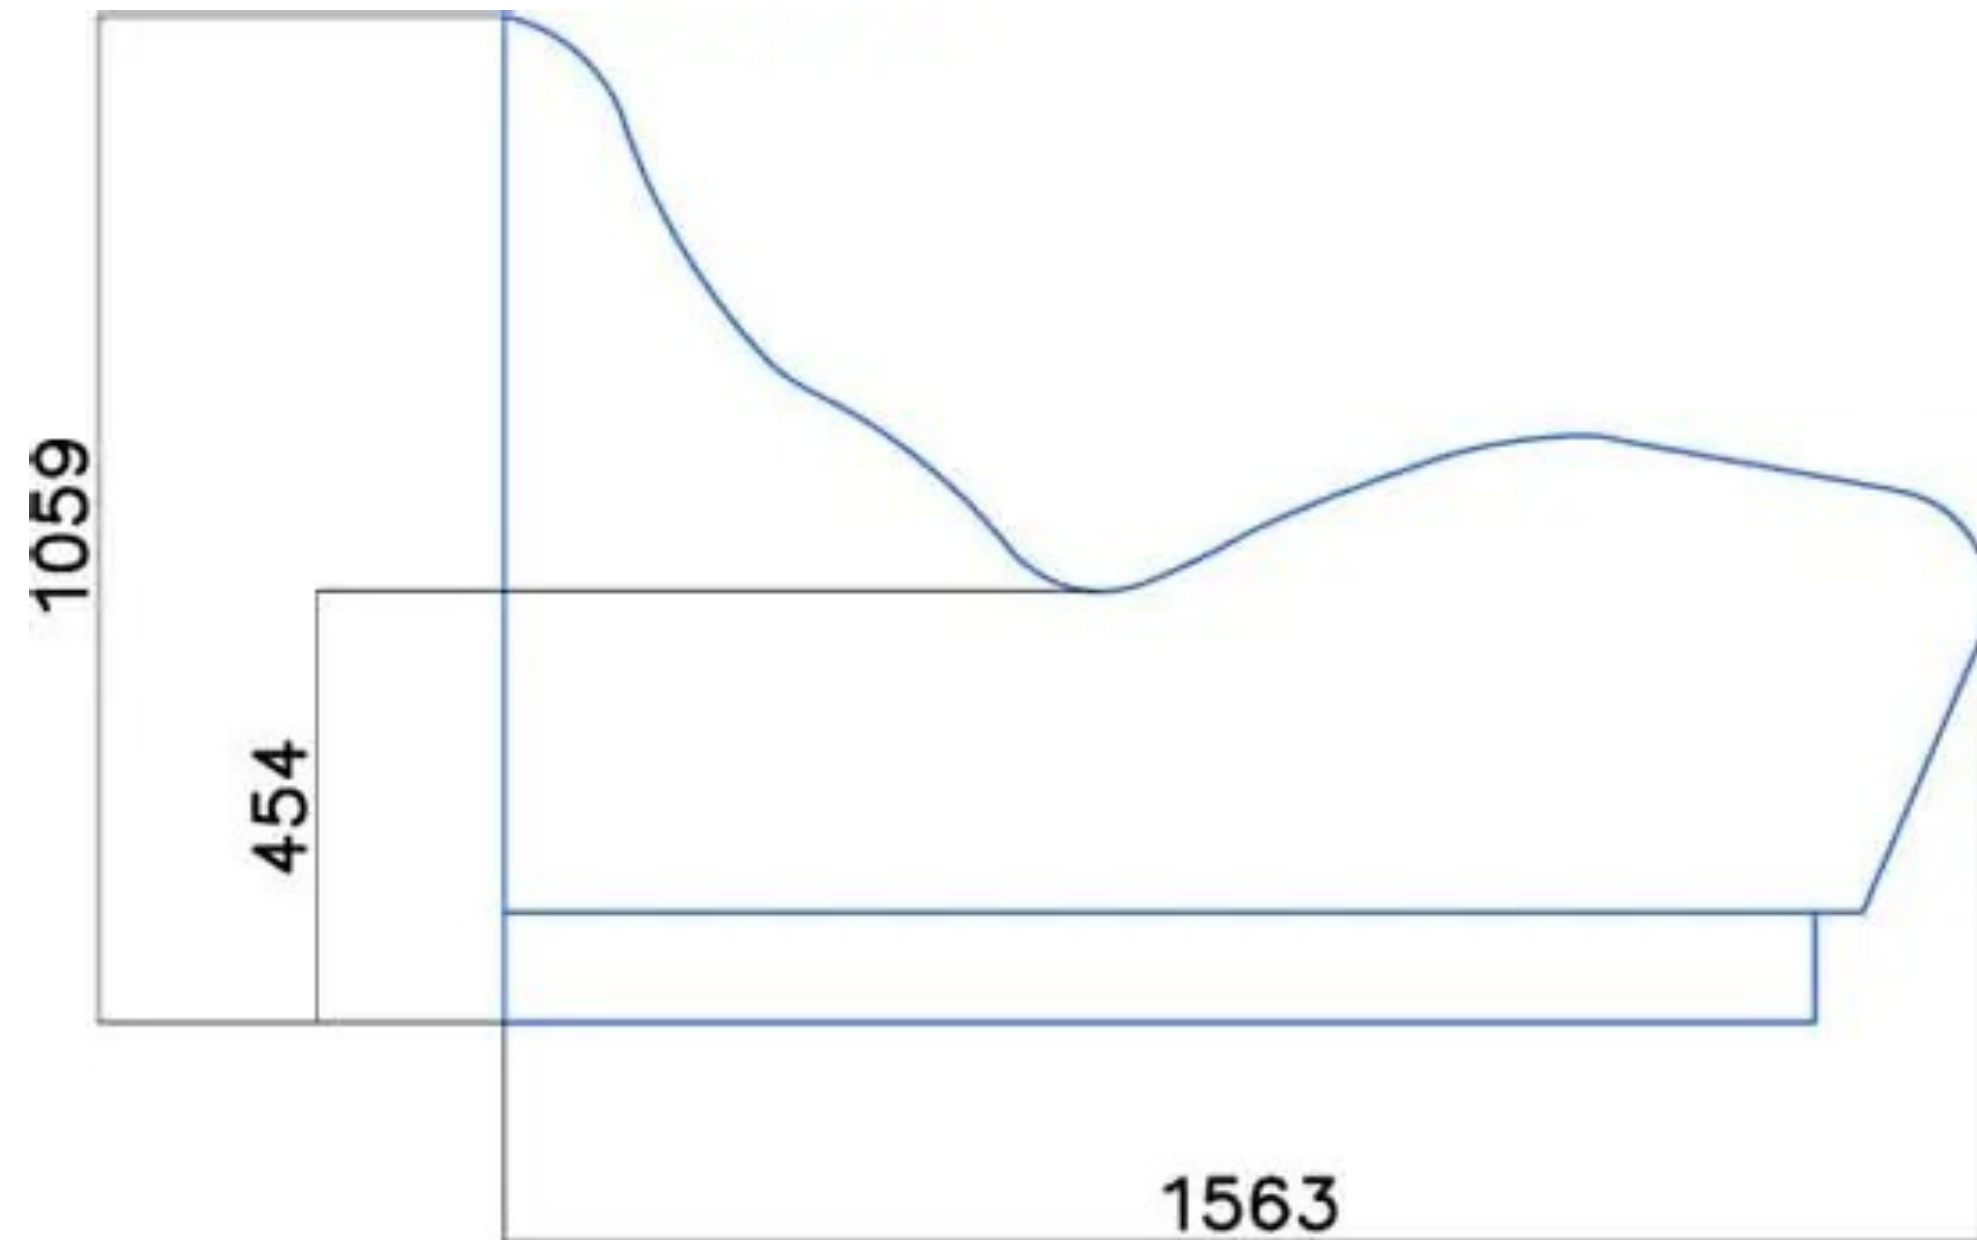

With over **900** colors available, almost any mosaic design can be laid out upon customer request.

HEATED INFRARED LOUNGER “WOODON”

OAK meets CONCRETE

You will feel a feeling of closeness to nature when you relax on our special kind of heated lounger. Warm oak wood covers the heated infrared lounger and on the surface you can warm yourself on seamless concrete.

Our product is characterized by the finest craftsmanship.

Give yourself over to a top-class deceleration. Be it in the private or hotel sector, our heated wellness lounger can take root anywhere thanks to its natural nature.

It fits perfectly in luxury chalets, country house-style hotel rooms and of course also in the rustic wellness area.
